

Seohyun Yun

Data Science Student

Long Beach, CA, USA / Seohyun.Yun01@student.csulb.edu / linkedin.com/in/ssshyun/ / 5622445528

Professional summary

Lithium-Ion Battery SOC Prediction using Machine Learning

- Built machine learning regression models (Random Forest, XGBoost) to predict lithium-ion battery state-of-charge (SOC)
- Applied SHAP analysis to interpret feature importance and improve model transparency
- Received **Excellence Award – 2025 Industrial Safety Coexistence Paper Competition**

Real-Time Object Detection for Surveillance UAV

- Evaluated image preprocessing techniques to improve object detection performance in low-quality environments
- Implemented YOLOv8 and analyzed detection accuracy and real-time processing speed (FPS)
- Received **Encouragement Award – 2025 Air Force Academy Future Aerospace Conference**

Abandoned Dog Adoption Data Analysis

- Collected and integrated adoption-related data from public APIs and web sources
- Performed data preprocessing, exploratory data analysis, and data visualization
- Built a Decision Tree model to identify factors influencing adoption outcomes

SafeWalk: Personal Safety Android Application

- Developed an Android safety application to support safe travel during nighttime
- Implemented location-based services using Google Maps API
- Built SOS emergency messaging, siren alerts, and simulated call safety features

Skills

Python	Java
SQL	R
Kotlin	

Education

MAR 2023 – FEB 2027
SEOUL

Bachelor's in Data Science, Seoul Women's University
GPA: 4.4 / 4.5
President, Data Science Student Association

Certifications

SQL Developer (SQLD)
KOREA DATA AGENCY (K-DATA) | SEP 2024

ADsP (Advanced Data Analytics Semi-Professional)
KOREA DATA AGENCY (K-DATA) | NOV 2025
