Projects

Stock Tracker - Web Application (*In Progress*)

JavaScript, [Next.js](#), Real-Time APIs, Inngest, Better Auth

- Building a user-facing tool to track real-time stock performance and portfolio allocations
- Implementing secure authentication and session management using Better Auth for real-world use
- Building event-driven background workflows with Inngest for alerts and asynchronous processing
- Developing interactive data visualizations and customizable watchlists to improve user engagement

2D Physics Simulation Engine

JavaScript, HTML5 Canvas

- Developed a custom rigid-body physics engine with vector and matrix math systems
- Implemented impulse-based collision detection and rotational dynamics
- Modeled elasticity, friction, and inertia for realistic motion behavior
- Built an interactive rendering loop using requestAnimationFrame

Fashion App - iOS App

SwiftUI

- Built a functional web application as part of a selective coding program
- Collaborated in a team-based environment using Git version control
- Applied product development principles to design and iterate on user-facing features

Experience

Director | Discord Moderator (800+ Members)

July 2020 – July 2021

- Managed a 800+ member community, establishing governance standards and engagement policies.
- Organized virtual events to increase active participation and retention

Digital Growth & Content Strategy (TikTok + YouTube)

Feb 2021-Present

- Grew TikTok account to 8,000+ followers through data-driven content testing and metrics analysis
- Launched multiple YouTube channels with thousands of views, optimizing for user engagement and retention
- A/B tested content hooks, thumbnails, and posting cadence to maximize retention

Tuba Section Leader - James Logan High School Band

August 2021 - May 2025

- Led section rehearsals and mentored younger musicians
- Coordinated performance preparation and ensured group cohesion

Tutor - Keoni Learning Center

Summer 2025

- Provided structured Math and English instruction, improving the analytical problem-solving skills of 20 students

Education

Bachelor of Science in Mathematics - Computer Science | GPA: 3.75/4.0

University of California, San Diego

Expected Graduation: Winter 2028

- **Focus:** Mathematics, Software Engineering, Artificial Intelligence, and Economics.
- **Relevant coursework:** Algorithms, Database Systems, Calculus, Linear Algebra, Macroeconomics, Microeconomics.

Technical Skills

Programming Languages: Python, Java, JavaScript, Luau, HTML/CSS

Frameworks & Tools: Next.js, Git, Inngest, Better Auth

Other Skills: Data Structures, OOP, Real-Time Systems, Authentication, API Integration
