EDUCATION

University of California, San Diego

San Diego, CA (June 2026)

Bachelor of Science: Cognitive Science, specializing in Machine Learning/Artificial Intelligence. Minor in Computer Science.

Coursework: Human-Computer Interaction, Data Structures & Algorithms, Discrete Math, Linear Algebra, Calculus

University of California, Santa Cruz

Santa Cruz, CA (2022 - 2024)

Bachelor of Science: Cognitive Science. Minor in Computer Science (Degree For Transfer)

GPA: 3.97/4.0. **Dean's List** 2022, 2023, 2024

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, R, HTML/CSS, SQL

Frameworks & Tools: React, Node.js, pandas, NumPy, Matplotlib, Scikit-Learn, GitHub, AWS

WORK EXPERIENCE

Software Development Intern

Sep 2025 - Present

Spacebourne

- Building core features for CLARITY, a **full-stack predictive RF-interference** platform that helps ground-station operators anticipate satellite communication disruptions before they occur.
- Learning how to implement backend services to ingest satellite TLEs, ITU frequency allocations, and environmental data.
- Contributed to the **React frontend dashboard** by implementing visualization components for global interference heatmaps, risk forecasts, and automated system reports.

Python Tutor

Sep 2024 - Oct 2025

Breakout Mentors

- Breakout Mentors is a mentorship program featuring a project-based curriculum personalized to each student's learning pace.
- Mentored students through personalized, project-based learning curriculums, taught programming skills in **Python and JavaScript**.
- Focused on hands-on learning, ensuring students grasp syntax, code structure, and problem-solving techniques.

Data/UX Consultant

May 2024 - Aug 2024

Develop For Good

- D4G is an organization that connects students with nonprofits to work on impactful projects; collaborated with Love Never Fails to create a mobile app prototype "AI Advocate" on Figma - a digital tool to help survivors of gender-based violence.
- Led **10+ usability tests and 5 interviews**, achieving a 20% boost in engagement through data-driven design improvements.
- **Worked with a cross-functional team** to produce detailed wireframes, mockups, and an interactive prototype to ensure clarity and ease of use across digital platforms.

PROJECTS

Heart Disease Prediction ML Project | (In Progress) Python, Scikit-learn, XGBoost, Streamlit, Pandas, Seaborn

UCSD AI Student Collective

- Building a machine learning pipeline to predict heart disease using the **Cleveland UCI dataset**
- Training and comparing multiple classification models (**Logistic Regression, SVM, XGBoost, Random Forest**)
- **Developing an interactive web app** using Streamlit for real-time patient risk prediction
- Applying hyperparameter tuning and feature importance analysis to optimize model performance

ORCA Research Project

May 2025 - Present

UCSD CSE Student Society

- Contributing to ORCA, an **AI-driven music** production platform for arrangement, transcription, and sheet-music digitization.
- Developing deep-learning models for **audio-to-MIDI transcription** and symbolic music representation.
- Working with large multimodal datasets (audio, MIDI, sheet music) to improve transcription accuracy and musical structure.

Front End Project

Dec 2024 - Feb 2025

[UCSD College Ranking Quiz](#)

- **Built** an engaging, responsive web application using **HTML, CSS, and JavaScript**.
- **Designed and implemented interactive UI elements**, including a personalized quiz, dynamic result visualizations, and interactive college profiles, ensuring an intuitive and seamless user experience.
- **Optimized front-end functionality** with responsive layouts, playful visual features, showcasing user-centric design.
