PROJECTS

Text Editor | C

- Developed a 1000-line terminal-based text editor in C from scratch, implementing raw terminal mode, keyboard input handling, real-time dynamic rendering
- Added editor features including cursor navigation, text insertion/deletion, file I/O, incremental search, and syntax highlighting
- Optimized for cross-terminal compatibility with memory-efficient data handling to support responsive, low-latency text editing.

Interactive Polling Web App | MongoDB, Express.js, React, Node.js

- Built a full-stack online polling web application using the MERN stack (MongoDB, Express, React, Node.js) that allows users to create & vote on custom polls visible to all users.
- Implemented RESTful APIs and a dynamic React frontend to handle poll creation, public viewing, voting, and real-time result updates with persistent MongoDB storage.

Weather App | HTML, CSS, JavaScript

- Developed a full-stack web application utilizing HTML, CSS, JS, and OpenWeatherMap API to communicate and display accurate weather data based on user location
