EDUCATION

University of Houston

Bachelor of Science in Computer Science, Minor in Mathematics

Houston, TX

Expected Dec 2027

Houston City College

Associate of Science in Computer Science

Houston, TX

Aug 2023 – Dec 2025

EXPERIENCE

Software Engineer Intern

B&W Realty Group LLC

Jan 2026 – Present

Houston, TX

- Reduced initial page load time by **30%** through critical rendering path optimization and responsive, mobile-first UI construction using HTML5, CSS Grid/Flexbox, and JavaScript (ES6+), delivering faster execution across desktop and mobile environments.
- Raised successful lead submissions by **25%** by implementing resilient client-side form workflows with validation, debouncing, and fault handling in JavaScript, yielding higher data integrity and lower abandonment rates.
- Strengthened search visibility and accessibility outcomes via semantic markup, structured metadata, and Lighthouse-based audits, achieving **measurable gains in discoverability and WCAG-aligned compliance**.

Mathematics and Computer Science Tutor

Houston City College

Mar 2024 – Dec 2025

Houston, TX

- Advanced student mastery of quantitative foundations for AI and computing by tutoring **Calculus, Linear Algebra, and introductory Computer Science**, improving problem-solving accuracy and conceptual understanding.
- Accelerated exam readiness by designing targeted practice problems, walkthroughs, and review sessions for homework and midterms, resulting in **measurable score improvements and reduced error rates**.
- Improved learning efficiency by translating complex theoretical material into step-by-step solutions and algorithmic reasoning, enabling students to independently tackle unseen problems in math- and CS-intensive courses.

Software Engineering Fellow

Headstarter AI

Jul 2024 – Sep 2024

Remote

- Built a web-based inventory management system supporting **real-time CRUD operations** for **100+ inventory items**, reducing manual tracking errors by **35%**.
- Implemented a responsive, accessible interface using **React and Material UI (MUI)**, achieving **95+ Lighthouse accessibility scores** and consistent behavior across desktop and mobile form factors.
- Deployed the application on **Vercel** with automated CI builds and preview environments, cutting deployment time by **40%** and enabling rapid iteration and live demonstrations.

PROJECTS

EduTag — Rice Datathon 2026 Winner

NLP / Machine Learning Project

Jan 2026

Houston, TX

- Built a hierarchical multi-label NLP system to align textbook sections with education standards using transformer-based embeddings, outperforming keyword-based baselines.
- Designed a retrieval-augmented pipeline with FAISS vector search and Gemini API data augmentation, achieving **77.7% Hit Rate@5** with low Hamming loss on sparse labels.
- Implemented end-to-end data pipelines in Python for preprocessing, vectorization, and evaluation of large-scale educational text corpora.

TECHNICAL SKILLS

- Languages:** Python, Java, C/C++, JavaScript, SQL (PostgreSQL), R, HTML/CSS
- Frameworks & APIs:** React, Node.js, Flask, FastAPI, Material UI
- Data & ML:** Pandas, NumPy, Matplotlib, Transformer-based NLP, FAISS
- Developer Tools:** Git, Docker, TravisCI, Google Cloud Platform, VS Code, IntelliJ, PyCharm
