Detail-oriented undergraduate at University of California San Diego pursuing dual degrees in Applied Mathematics and Data Science. Experienced in AI, data analytics, and software development through internships and projects. Skilled in Python, C++, and machine learning, with a strong record of teamwork and delivering solutions to complex problems.

EDUCATION

University of California San Diego

Jun 2027

B.S. Applied Mathematics, B.S. Data Science

- **GPA:** 3.82
- **Courses:** Linear Algebra, Numerical Analysis, Calculus, Differential Equations, Stochastic Processes, Real Analysis, Data Structures & Algorithms, Data Visualization, Data Management, Machine Learning, Probabilistic Modeling, Recommender Systems
- Provost **Honors** received all quarters

EXPERIENCE

University of California San Diego, Academic Tutor/Grader — Mathematics

Apr 2025 – Dec 2025

- Helped facilitate discussion sessions for 500 students across 3 classes and proctored/graded exams and homework.
- Held weekly office hours to provide individualized support to students outside lectures.

Deloitte, Intern

Jul 2025 – Sep 2025

- Engineered an automation tool for 1000+ clients to streamline the corporate tax return process.
- Integrated Amazon Bedrock (Converse API) and advanced LLMs (Nova, Claude) to boost ITR field accuracy above 90%.
- Developed a GenAI-powered Business Requirements Document (BRD) validation interface using Appsmith, enabling business analysts to validate BRDs 50% faster and improving operational efficiency.

VTION Digital, AI Intern

Jul 2024 – Sep 2024

- Built a chatbot enabling clients to interact with data and create media plans using natural language input.
- Designed a multi-agent framework with Agency Swarm and optimized agent prompts for quality output.
- Deployed the chatbot live on Gradio servers.

Social Media Intelligence Lab, Georgia State University, Research Intern

Jul 2022

- Analyzed firms' marketing strategies in the Metaverse and consumer reactions.
- Scraped data from blogs, forums, and articles using Python; extracted consumer insights via Talkwalker.
- Cleaned text data, generated word clouds, and conducted Bigram analyses for deeper insights.
- Performed sentiment analysis and topic modeling to identify key themes.

Godrej Consumer Products Ltd. (GCPL), Marketing & Advertising Intern

Jul 2022

- Analyzed advertising mediums (TV, digital, cinema, etc.) to establish causality between ad metrics and outcomes like footfalls and Google Search Index.
- Leveraged MS Excel tools for data analysis, pivots, and visualizations.
- Quantified causality strength using mathematical indices.

PROJECTS

Othello Engine

Jun 2024

- Developed a 2-player Othello (Reversi) game with a terminal interface in C++.
- Built a computer engine using the Negamax algorithm, optimized with $\alpha - \beta$ pruning and iterative deepening for enhanced performance, boosting move evaluation efficiency by 90%.
- Implemented dynamic evaluation functions for strategic decision-making, improving win rate by over 50%.

Atreus (A Discord Bot)

Jun 2021

- Created a multifunctional Discord bot for moderation, music, utility, and miscellaneous tasks using Discord.js.
- Replaced the primary music bot in 5+ servers, providing services to over 50 users.
- Delivered consistent functionality and uptime, earning positive feedback from server communities.

SKILLS & ACTIVITIES

Programming languages: Python, SQL, Java, C, C++, JavaScript, HTML, CSS, $\LaTeX$, Markdown

Frameworks: Git/Github, Scikit-learn, NumPy, Pandas, Matplotlib, Plotly, NLTK, BeautifulSoup, AWS Bedrock, SQLite, PostgreSQL

Certifications: Excel, Machine Learning, Intro to Mathematical Thinking

Spoken languages: English, Hindi, Gujarati, French

Hobbies: Karate, Boulderling, Hiking, Shutterbug photography
