

Yingyi Zhu

PROFILE

Master's student in Bioengineering at the UC, San Diego. Committed to advancing biotechnology innovation through practical and interdisciplinary approaches, with experience in fermentation process optimization and research and development.

EXPERIENCE

Advanced BioCatalytics, Irvine, CA

Research & Development Biologist (2022 - Present)

Conducted performance analysis on biosurfactants and downstream methodologies
Optimized fermentation processes production from laboratory to pilot-scale systems
Performed quality control testing to support product consistency and efficacy

Burgess & Niple, Columbus, OH

Capstone Project Researcher (2021 - 2022)

Researched nutrient removal processes to mitigate harmful algal blooms
Emphasized constructed wetlands usage, addressing environmental community needs
Designed a practical and feasible solution for the city of St. Marys, Ohio

Ohio State University iGEM Team, Columbus, OH

Undergraduate Mentor (2021 - 2022)

Awarded the Gold Medal for developing a phage therapy database to combat sepsis
Contributed to the wiki team by coding and presenting the project effectively
Shot and edited promotional videos to enhance project visibility and impact

Ohio State University College of Medicine, Columbus, OH

Undergraduate Assistant (2021)

Worked in Bioinformatics and Mathematical Bioscience Laboratory
Prepared course material and presentations for Biomedical informatics courses
Presented weekly progress updates, contributing to collaborative research

EDUCATION

Ohio State University, Columbus, OH

Bachelor of Science in Biological Engineering, 2022; GPA: 3.873

SKILLS

- Skilled in molecular biology lab techniques of DNA extraction and TOPO cloning
- Proficient in C, MATLAB, and Linux OS for software development programming
- Experienced in GUI design in MATLAB for data visualization and user interaction
