

YUVRAJ GABA

+714-287-2454 | yuvrajgaba919@gmail.com | linkedin.com/in/yuvrajgaba/ | Santa Ana, CA

EDUCATION

Irvine Valley College

August 2025 – May 2027

A.S. Mechanical Engineering, Honors Program | GPA: 3.96 | Dean's List, Fall 2025

- Member of Engineering Club, Circle K International, South Asian Student Association, and Speech & Debate

Arnold O. Beckman High School

Graduated May 2025

High School Diploma | GPA: 4.44 | Selected as Commencement Speaker

WORK EXPERIENCE

Engineering Associate

June 2025 – Present

iFiber Optix | Tustin, CA

- Wrote Corrective Action Reports (CARs) for clients including L3 Harris and T-Mobile, investigating root causes and documenting corrective actions in line with ISO 9000 standards
- Worked directly on-site with engineering teams across multiple client sites to implement, test, and validate telecom system deployments
- Designed and built the iFiber Optix company website from scratch as the sole front-end developer, covering UI design, layout, and content management
- Wrote training documentation and ran hands-on sessions with team members on OTDR setup, calibration, and operation
- Identified workflow inefficiencies and supported process improvement efforts through technical write-ups and updated internal documentation

Data Entry Specialist

March 2024 – June 2025

iFiber Optix | Tustin, CA

- Managed and cleaned large customer pricing datasets for telecom clients, building structured reports used by engineering and management for client-facing decisions
- Kept data systems organized and reliable across projects, cutting down on back-and-forth between teams looking for accurate numbers

TECHNICAL PROJECTS

SentinelQ – Intelligent Edge Security System

March 2026

Python, YOLO, OpenCV, Arduino, Supabase, REST APIs | Hackathon Build

- Built a full edge-to-cloud video pipeline where an Arduino handles local motion detection and a YOLO-based cloud service processes flagged frames, applying confidence scoring and threat classification in real time
- Wrote frame quality analysis logic measuring blur, brightness, and noise to decide whether cloud escalation was worth the cost, keeping false positive rates low
- Designed the incident logging system from scratch: every event stored with a risk score, written summary, bounding-box snapshot, and cloud analysis job record for full traceability
- Owned the database schema and API contracts used across hardware, ML, and web teams, making sure all three sides stayed in sync throughout the build

RESEARCH EXPERIENCE

Undergraduate Researcher | HTCC Student Research Conference, UC Riverside

March 2026

Blinded by the Light: The Science Behind Modern Headlight Glare

- Looked into how LED semiconductor design affects scotopic vision in drivers; ran spectroscopic flame tests to collect physical data and cross-referenced it with published research on automotive lighting regulations

Undergraduate Researcher | IVC x Saddleback College Research Symposium

November 2025

AI and Neurotechnology in Healthcare: Ethics and Regulation

- Did a full literature review on brain-computer interface use in clinical settings, focusing on where current regulation falls short in protecting patient neural data

CERTIFICATIONS AND AWARDS

Materials Science for Technological Application Specialization – ASU via Coursera

Feb 2026

- Covered atomic bonding, crystal structures, and how material properties translate into real engineering decisions

Certificate of Proficiency in Research Tools for Entrepreneurs

Sep 2025

3rd Place, Impromptu Speaking | NOF Elm Async Invite

Dec 2025

Dean's List

Fall 2025

SKILLS

Python, Java, Excel and Google Sheets (data analysis, dashboards), Microsoft Office Suite, Google Workspace, WordPress (UI/UX design and content management), OTDR operation, Sage Businessworks, ISO 9000, data analysis and reporting
