Sunisa Saeli

San Diego, CA | (469)-588-3873 | sunisastudy@gmail.com | <http://linkedin.com/in/sunisa-saeli>

EDUCATION

University of California, San Diego | La Jolla, CA
B.S. in Data Science; Minor in Mathematics

Expected June 2027

Dallas College | Dallas, TX
A.S. in Computer Science - Chancellor's Honor Roll

May 2025
GPA 4.00

SKILLS

Technical: C++, Java, Python, R, Pandas, and SQL | **Tools:** Git, Arduino IDE, Fusion 360, KiCad, Microsoft Office, Notion, Canva

Professional: Technical Documentation, Troubleshooting, Data Analysis, Trilingual (EN, TH, CH)

Coursework: Intro to Programming (C++ & Python), Object-Oriented Programming, Data Structure, Linear Algebra, Statistical Methods

Leadership: Problem Solving, Project Management, Collaboration, Delegation, Event Organization, Public Speaking

WORK EXPERIENCE

ITS Student Engineer | IT Department | UC San Diego

Sep 2025 - Present

- Expand time-tracking automation to integrate Zoom, Teams, and Outlook data, streamlining daily activity logging into ITS-Pro
- Develop and debug prototype APIs and front-end features for UCSD's mobile app to help students access coursework and campus services
- Enhance system reliability by resolving Outlook and JIRA sync bugs and improving flexibility in automation key recognition
- Streamline installation, enable auto-updates, and improve user experience through one-click approval and journal features
- Collaborate through pair programming and agile workflows to refine functionality and improve user experience

Project Assistant & STEM Ambassador | Dallas College

Nov 2024 - Aug 2025

- Mentored college students in Arduino UNO R3, hardware wiring, and robotics using LEGO kits with C++
- Designed and delivered weekly outreach campaigns, increasing STEM event engagement by 20% among 1,160+ students
- Tutored students in Calculus, C++, Java, and provided support in troubleshooting coding errors and device setup
- Guided 4+ peers weekly in academic planning, goal setting, research opportunities, and STEM pathways

PROJECTS

AI Resume Parser | Dallas AI Summer Project

Jun - Aug 2025

- Co-developed a Streamlit app integrating Weaviate vector DB and OpenAI API for semantic search and resume parsing
- Implemented PDF text extraction and structured parsing to store searchable resume data for advanced analysis
- Built a project to address students' job application challenges by matching resumes to suitable roles and suggesting skill improvement

ASME Student Design Competition | Ball Bearing Sorting

Jan - Apr 2025

- Assisted with coding and prototyping for ball bearing sorting projects, ensuring that technical elements align with event goals
- Collaborated with the mechanical team to address challenges and optimize device structure, and integrated all electrical components while innovatively converting between mechanical and electrical power to improve efficiency
- Led all administrative tasks for the ASME Student Competition, including managing schedules, coordinating communications, and ensuring smooth operations
- Created and edited videos for the competition, highlighting key moments, and promoting the event across multiple platforms

ARISE Arduino Innovation Research Program | Undergraduate Research

Sep - Dec 2024

- Developed the "Study-AI-Lamp," integrating touch control, photoresistors, Arduino UNO R3, adaptive brightness LED, wireless charging, and Pomodoro timer function
- Improved productivity by 15% from baseline measurements during controlled user trials using focus-time analytics
- Designed PCB and CAD 3D modeling in Fusion 360 and reiterate prototypes to optimize hardware-software integration
- Documented system workflows, component interactions, BOM, and process diagrams using PowerPoint for academics

LEADERSHIP & ORGANIZATION

President | STEM League

Mar 2024 - May 2025

- Facilitated hands-on STEM workshops focused on circuit design and coding, reaching over 60+ students across campus
- Expanded club membership by 30% and promoted inclusivity through collaboration with SWE and cross-campus partners

Vice President | Programming Club

Feb 2024 - May 2025

- Organized biweekly C++/Java, p5.js for visual-related, and Arduino workshops, mentored peers in technical and leadership development
- Expanded engagement by 20% through peer-led coding and academic partnerships with the campus library

Vice President & Treasurer | Student Government Association

Feb - Oct 2024

- Managed \$5,000 budget using Excel, provided financial updates, transparency, and resolved tracking discrepancies
- Directed service initiatives that mobilized 350+ students and increased social media reach by 4,523+ new viewers and 130+ followers
