EXPERIENCE

Amazon, Software Development Engineer

Bay Area, CA | June 2025 – Present

- Designed and launched a full-stack AI automation platform (CrewAI) to reduce end-to-end QA workflow cycle time from **3 - 4 days** to under **~30 minutes**, handling **1000+** automation requests weekly.
- Architected a scalable, loosely coupled cloud deployment on AWS using CI/CD pipelines, Cloudfront, Multi-AZ ALB, EC2, RDS, and S3, achieving 99.99% uptime for **250+** concurrent task executions.
- Built a React frontend and Python FastAPI backend supporting **6 AI service workflows**, leveraging WebSockets to stream live agent actions, task progress, and historical execution data for asynchronous automation runs
- Implemented an event-driven analytics infrastructure tracking user behavior, feature adoption, and platform performance, processing **800+ daily events** with no impact on application latency.
- Designed a normalized PostgreSQL schema with **7+** tables supporting task lifecycle management, analytics, and personalization, enabling state tracking and consistent platform behavior across multiple browsing sessions.
- Developed QuickSight Analyses providing real-time visibility into platform adoption and user engagement, enabling **Device OS leadership** to drive data-informed Q4 roadmap priorities.

DigiClips, Inc, Software Engineer (Capstone Project)

| Aug 2024 – May 2025

- Designed and implemented a web platform using **React** and backend APIs, translating product requirements and UX mockups into **10+** production-grade pages serving **2K+** monthly users.
- Enhanced application accessibility by introducing semantic HTML, ARIA roles, and keyboard navigation support, improving compliance with **WCAG** standards across critical user interactions.
- Collaborated in an **Agile Scrum** environment, participating in sprint planning, backlog grooming, code reviews, and retrospectives while delivering incremental features across multiple sprints.

Amazon, Software Development Engineer Intern

Bay Area, CA | May 2024 – Aug 2024

- Designed and launched a **microservice on AWS** to automate the end-to-end lifecycle of raw metrics for Alexa family devices, streamlining scheduling, ingestion, processing, and trend visualization.
- Replaced manual anomaly detection with an **RDS-backed solution**, reducing processing time by **90%** and enabling faster identification of faulty devices.
- Architected a **modular codebase** enabling independent integration of storage, algorithms, and visualization components, improving execution efficiency by **96%** and reducing feature rollout time.

Amazon, Software Development Engineer Intern

Bay Area, CA | May 2023 – Aug 2023

- Developed a **device memory monitoring framework** for Alexa family devices during test execution, generating logs and visualizations to improve diagnostics and memory analysis.
- Implemented a SQL-based engine for parallel data retrieval from AWS S3, **reducing download time by 80%** and improving large-scale data access efficiency.
- Collaborated with cross-functional teams using **agile methodologies** to gather requirements, design system architecture, and deliver performance-critical features.

PROJECTS

Tesla LeaseIQ | Next.js, React, PWA, (OpenAI, Tesla, Google Sheets) API

2025

- Built a Tesla API-driven lease analytics web-app with an offline-capable **PWA** architecture, delivering real-time insights into mileage utilization, and driving patterns via responsive components.
- Automated charging cost ingestion (**image/OCR pipeline**) and advisor insights using **LLM function calls** (OpenAI), achieving **93%+ ingestion accuracy** across real-world receipts.

SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, C++, SQL, React, Next.js

Backend & Data: Flask, FastAPI, SQLAlchemy, SQLite3, PostgreSQL, Rest APIs, GraphQL

AI Systems: LLM-based workflows, tool-augmented inference pipelines, multi-agent orchestration

Cloud & DevOps: AWS (ALB, EC2, RDS, S3, Lambda, IAM, QuickSight), Docker, CI/CD, Git, GitHub

System Design: Microservices Architecture, Event-Driven Systems, API Design, Relational & Non-relational Databases

EDUCATION

State School

City, State | 2025

B.S. in Computer Science (Dean's List)
