New Jersey Institute of Technology*Bachelor of Science, Computer Science*

Newark, NJ

May 2029

EXPERIENCE

Software Engineer Intern

Dec. 2025 – Jan. 2026

*unknown ed-tech startup**Remote*

- Contributed to the development of —, a full-stack web platform using React, AWS Amplify, OpenAI API, Render, and Stripe, helping process 120+ syllabus PDFs into structured academic dashboards
- Assisted in refining OpenAI prompt design, improving syllabus data extraction accuracy by 25% and reducing AI response latency by 30% during internal testing
- Collaborated with a small engineering team to ship 3+ production features, supporting frontend components, backend APIs, and payment workflow testing

Advanced Repair Agent

Sep. 2025 – Dec. 2025

*Geek Squad**NJ*

- Contributed to the store achieving a Top-10 ranked Geek Squad precinct by consistently resolving high-complexity hardware and OS-level issues with minimal rework
- Supported high-volume repair operations by maintaining fast turnaround times and strong first-pass fix rates across Windows and macOS systems
- Troubleshooted and remediated issues involving OS corruption, boot failures, driver conflicts, BIOS/UEFI configuration, and peripheral integration

IT & Software Intern

Sep. 2024 – Aug. 2025

*School District**NJ*

- Supported IT operations for —, managing and expanding infrastructure across a multi-building campus with 22,000+ devices and enterprise-grade systems
- Collaborated with technicians, senior system administrators, and software developers to resolve complex hardware, software, and networking issues
- Played a key role in the network deployment and configuration of a newly constructed building, helping expand high-speed connectivity and system access

PROJECTS

Tradix | *Python, Discord.py, Alpha Vantage API, JSON, RESTful APIs*

- Developed a Discord bot to retrieve and display daily and weekly stock data using Alpha Vantage API.
- Implemented commands to retrieve data for up to 60 tickers per request, including gainers/losers, and earnings reports.
- Integrated news and sentiment analysis for stocks, providing real-time market insights.
- Optimized backend logic to support high-throughput performance, with potential to make 1,200+ requests per minute.

Photon | *HTML/CSS, JavaScript, Pexels API, Netlify*

- Developed a responsive Pexels clone with real-time access to 3.2M+ high-quality images leveraging the full Pexels API.
- Integrated dynamic search functionality with real-time filtering and support for 1,000+ user requests.
- Implemented user-friendly features, including a "Load More" button for seamless browsing and photo download.
- Designed a visually appealing and mobile-responsive interface ensuring cross-device compatibility.

Blog App | *HTML/CSS, EJS, Express.js, Git*

- Built a dynamic blog app using EJS for templating and Express.js for seamless routing and server-side logic.
- Designed and implemented RESTful routes for creating, storing, and viewing posts with dynamic URLs.
- Incorporated lodash for string manipulation to enable user-friendly URL matching for blog entries.
- Used Node.js and Express static middleware to manage backend logic and serve static assets efficiently.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, HTML/CSS**Frameworks:** React, Node.js, Express.js, Bootstrap, Tailwind**Developer Tools:** Git, Vite, npm, Firebase, Netlify, VS Code, PyCharm, Postman
