EXPERIENCE

Information Technology Support (Field Technician / Help Desk Intern) Mar. 2024 – Nov. 2025
San Antonio Independent School District *San Antonio, TX*

- Diagnosed and resolved on-site hardware, network, and system failures under time-sensitive conditions.
- Troubleshoot LAN and Wi-Fi issues, device configurations, and system outages across district facilities.
- Logged, tracked, and resolved support tickets while providing on-site and remote technical support.

Capital One — LaunchPad: Legacy & Leadership Program (HACU × TMCf) Jul. 2025
Capital One *Mclean, VA*

- Selected as one of 100 students nationally for a Capital One 5 day mentorship program focused on technology, leadership, and fintech systems.
- Built and evaluated quantitative profitability and risk models, analyzing credit utilization, charge-off rates, operating costs, and customer volume.
- Delivered a data-driven capstone presentation to Capital One mentors, communicating tradeoffs, constraints, and risk mitigation.
- Modeled international expansion scenarios across the U.S., Canada, Australia, and Mexico, projecting \$67B+ in five-year profit

LTS (Local-Technology-Support) Apprenticeship Jan. 2024 – Mar. 2024
Accenture Federal Services *San Antonio, TX*

- Maintained and re-imaged company laptops; coordinated logistics for device deployment.
- Trained in Agile standards and enterprise IT workflows.

RESEARCH & PROJECTS

Undergraduate Research Assistant | *Ai Agents, Kubernetes, Docker* Jul. 2025 – Aug. 2025

- Assisted in designing KubeLLM, multi-agent LLM framework to manage a Kubernetes cluster. The agent is developed using the Phidata framework with the flexibility to utilize various models including Llama, Open AI GPT 4o, Google Gemini, etc.

- KubeLLM agents are equipped with Linux shell tools, interacts with a RAG-based knowledge agent to diagnose Kubernetes configuration issues and apply necessary fixes.
- Evaluated model accuracy by analyzing test results and visualizing performance metrics through plotted figures to assess LLM agent effectiveness.

Unbound | *Python, Flask, JavaScript, HTML/CSS, Gemini AI* Oct. 2025

- A simple payment processing application that allows users to plan their travel expenses. Users can create a travel plan, add events with associated costs, and split the total cost among a party.
- Secure backend using Python and Flask to manage trip data, generate shareable access codes, and track real-time funding contributions
- Executed a working prototype within a high-pressure 24-hour time frame, prioritizing core functionality and secure contribution

EDUCATION

University of Texas at San Antonio—B.S. Software Engineering, GPA: 3.6 Aug. 2025 – Dec. 2027

San Antonio College— A.S. Computer Science, GPA: 3.82 Aug. 2023 – May. 2025

TECHNICAL SKILLS

Languages: Python, C/C++, Java, HTML/CSS, Bash
Frameworks: Docker, Kubernetes, Phidata
Developer Tools: Git, Xcode, VS Code, Visual Studio
