EDUCATION

Private University

Sep. 2023 - Present

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Introduction to Databases, Artificial Intelligence, Linear Algebra & Differential Equations, Discrete Mathematics

PROJECTS

Hone | Python, React.js, FastAPI, TypeScript, OpenAI API

Jul. 2025 - Present

- Developing a full-stack, AI-powered interactive interview simulation web application with live responses.
- Architecting the backend with Python using **FastAPI**, supporting real-time audio capture, speech-to-text, and generating tailored questions and feedback with **OpenAI API**.
- Constructing a natural, user-friendly UI using **React.js/Vite** to enable seamless AI interaction, achieving sub-300ms total latency.

Mira | React Native, TypeScript, Expo CLI

Oct. 2025 - Dec. 2025

- Developed an iOS social media app for photographers to share photos, gear, and shooting locations using **React Native** and **Supabase/PostgreSQL**.
- Created a production-ready **relational schema** supporting posts, metadata (GPS location, camera/lens), comments, and likes.
- Designed a mobile-first UI that emphasizes clean navigation and a visually polished user experience

Echo | Python, Jupyter, ~~ipywidgets~~, OpenAI API

Apr. 2025 - Jul. 2025

- Built an AI-driven program that generates summaries from spoken content and pre-existing transcripts, with a focus on meetings, lectures, and other productivity-oriented use cases.
- Leveraged Python for audio capture, transcript parsing, and interface (**ipywidgets/Jupyter**) with **OpenAI API** for generating context-aware summaries.
- **Reduced transcript review time by over 70% for test users**

Flipper | C++, Arduino

Feb. 2024 - May 2024

- Led development of an automated book-page flipper catering to mobility-limited users.
- Oversaw engineering of components, with focus on programming motor controls using **C++** and **Arduino**.
- **Undercut budget by 47%** and successfully delivered a fully operational prototype within a 10-week timeline with three team members, earning a perfect score and a spot in the showcase event.

EXPERIENCE

Ergonomics Engineer

Jan. 2024 - Dec. 2024

University Motorsports Team

New York, NY

- Designed and iterated on driver-interaction components in CAD using SolidWorks, balancing ergonomics, safety requirements, and ease of manufacturing.

Product Specialist

Jul. 2023 - Sep. 2023

Subaru Dealer

New York, NY

- Delivered walkthroughs of vehicle software system functions to non-technical users, adapting explanations based on user needs.
- Supported customer onboarding by guiding users through system setup at delivery, answering usability questions, and ensuring confidence with in-vehicle software before handoff.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, HTML, CSS, SQL (Postgres, MySQL)

Frameworks: React.js, React Native, Node.js, FastAPI

Developer Tools: Git, Github Actions, VS Code, Supabase, Expo CLI, OpenAI API, REST APIs, Jupyter Notebook, CI/CD, Agile Methodologies
