

EDUCATION

Bachelors of Science in Computer Science

Expected May 2027

- **GPA:** 3.9/4.0
- **Relevant Coursework:** Data Structures, Web Development, Analysis of Algorithms, Operating Systems, Intro to Databases, Software Engineering I, II

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, TypeScript, SQL

Frameworks/Libraries: React.js, Next.js, Express.js, Node.js, TailwindCSS

Databases: MongoDB, PostgreSQL

Developer Tools: Git, GitHub, VS Code, AWS, Docker, Vercel, Prisma ORM

EXPERIENCE

Software Developer

June 2025 - Present

- Engineered backend infrastructure to scale Oregon's largest hackathon, increasing participant capacity from 50 to 300+ and streamlining event operations for all stakeholders.
- Constructed secure API endpoints with role-based authentication and authorization, protecting user data and supporting 300+ active users across multiple platform features
- Collaborated with 5+ developers in agile sprints to iteratively deliver authentication and submission features

Undergraduate Teaching Assistant

Sept 2025 - Dec 2025

- Mentored 150+ students in JavaScript, Node.js, and Express.js, facilitating deeper understanding of web development concepts and programming language fundamentals
- Improved student comprehension of complex topics like REST API design by hosting 5+ weekly office hours, contributing to an average score of 92% on student assignment submissions
- Conducted 20+ weekly graded code reviews on student assignments, reinforcing software engineering principles

PROJECTS

Hackathon Submission Platform | TypeScript, Next.js, PostgreSQL, TailwindCSS, Prisma

- Deployed a full-stack web platform with Next.js and PostgreSQL for 300+ users with real-time submission tracking and judging management, significantly improving operational efficiency by reducing manual overhead
- Implemented a project submission feature with multi-step form validation, file/video uploads for demos and presentations, and automated status updates visible to participants and judges
- Developed a judging interface with filtering and sorting capabilities, enabling judges to efficiently review submissions by category and submit scores for projects with rubric criteria

AI Voice Archive | ElevenLabs, TypeScript, Next.js, PostgreSQL, TailwindCSS, Neon, Prisma

- Secured 'Best Use of ElevenLabs API' award among 160+ participants at University of Oregon hackathon with an AI-powered platform for preserving and generating voice recordings through voice cloning technology
- Engineered robust integration with ElevenLabs Voice Cloning API, creating personalized voice recordings with comprehensive error handling and API response validation to ensure system reliability and data integrity

Speech-to-Text AI Note Converter | HTML/CSS, Javascript, Express.js, React.js, MongoDB

- Engineered a full-stack application allowing users to convert speech into organized notes, integrating Web Speech API for real-time audio transcription and AI-powered note organization
- Leveraged Google Gemini API for AI note creation, streamlining transcription from 5-min audio to notes in 30s

LEADERSHIP

Tech Officer

May 2024 - Present

Google Developer Group Club

- Design and deliver weekly technical presentations covering industry technologies and tools for **25+ students**
- Create and facilitate hands-on coding challenges aligned with weekly presentations, promoting collaborative problem-solving and practical skill development in software engineering
