SUMMARY

Senior backend and systems-focused software engineer with full production ownership of internal platforms in a regulated financial services environment. Experienced in refactoring and operating Go-based distributed systems, authentication services, and data models under real operational constraints. Strong judgment around reliability, security, and long-term maintainability.

EXPERIENCE

Senior Software Engineer

Sep 2024 - Present

INVESTMENT FIRM

- Own the design and evolution of an internal platform supporting core operational workflows in a regulated financial services environment
- Refactored an early monolithic system into multiple Go-based services with clearer domain boundaries, improved maintainability, and reduced operational risk
- Designed authentication and authorization flows with Kubernetes OIDC-authenticated ingress, using JWT-based service verification
- Built and maintained PostgreSQL schemas and migration workflows, correcting earlier data modeling issues and improving data integrity guarantees
- Designed and deployed an internal AI-assistant application for operational workflows, implementing explicit security controls and usage guardrails appropriate for financial data
- Operate production systems end-to-end, including Kubernetes deployments, Helm configuration, CI/CD pipelines, and incident response
- Partner closely with non-technical stakeholders to translate compliance and operational constraints into durable technical design decisions

Financial Advisor

Jun 2023 - Sep 2024

INVESTMENT FIRM

- Worked in a heavily regulated financial environment, developing a strong understanding of compliance requirements, operational risk, and audit considerations
- Managed sensitive client data and complex business rules, informing later software design decisions around data integrity, access control, and failure modes
- Collaborated with non-technical stakeholders to translate regulatory and business constraints into repeatable operational processes

EDUCATION

Computer Science B.S.

Expected Sep 2026

Online University

TECHNOLOGIES

- **Languages:** Go, Python, Java, JavaScript
- **Databases:** PostgreSQL
- **Systems & Infrastructure:** Kubernetes, Helm, Linux (incl. NixOS), CI/CD pipelines
- **Architecture:** Distributed systems, authentication & authorization, configuration management

CERTIFICATIONS

- FINRA Series 7 (General Securities Representative)
- FINRA Series 66 (Uniform Combined State Law)
