EDUCATION

University of California, San Diego

San Diego, CA

B.S. in Data Science, Minor in Business Analytics

Expected June 2027

- **Relevant Coursework:** Statistical Inference, Data Analysis and Visualization, Machine Learning Foundations, Business Analytics, Market Research, Optimization, Data Structures and Algorithms
- **Activities:** Society of Women Engineers, Association for Computing Machinery, Product Management Club

EXPERIENCE

Technical Product Manager

Sep. 2025 – Present

Computer Science and Engineering Society

San Diego, CA

- Leading development of TritonSpend, a budgeting app for students in collaboration with the Basic Needs Center.
- Defining MVP scope, writing user stories, and prioritizing login, budgeting, and spending dashboard features.
- Managing sprints and partnering with engineers and designers to build in React Native with aligned UI flows.
- Conducting student interviews and prototype testing to refine financial goals, alerts, and spending insights.

Professional Lead

Sep. 2025 – Present

Data Science Student Society

San Diego, CA

- Organizing networking events, internship panels, and workshops supporting student career growth in data science.
- Partnering with industry speakers and alumni to plan professional-skills sessions on resumes and elevator pitches.
- Coordinating event logistics, outreach, and engagement to deliver high-value programming for 100+ students.

Product Consultant

Nov. 2024 – June 2025

180 Degrees Consulting

Santa Cruz, CA

- Delivered recommendations to nonprofits via market research, stakeholder interviews, and competitive analysis.
- Collaborated with a 7+ consultant team to scope goals, set success metrics, and build data-driven client solutions.
- Contributed to final deliverables and presentations, turning insights into actionable implementation plans.

Software Developer

Sep. 2024 – June 2025

Google Developer Student Club

Santa Cruz, CA

- Collaborated on development of a web application, contributing user stories and defining feature requirements.
- Delivered three workshops on applied ML deployment framed around real-world product use cases.

Technical Program Manager

Jan. 2025 – June 2025

UCSC Baskin School of Engineering

Santa Cruz, CA

- Managed academic program logistics for 40+ students, coordinating resources to support student success outcomes.
- Designed a mentorship initiative that increased student engagement and retention metrics by 15%.
- Streamlined course feedback processes, cutting collection and analysis time by nearly 30%.

PROJECTS

Customer Churn Prediction

Jan. 2024 – Mar. 2024

Personal Project

- Built ML models (Logistic Regression, Random Forest) to predict customer churn using open telecom data.
- Created interactive Tableau dashboards to visualize churn risk patterns and highlight retention strategies.

Movie Recommendation System

Apr. 2024 – June 2024

Personal Project

- Developed a collaborative filtering recommender on the MovieLens dataset with 100k+ user ratings and metadata.
- Prototyped a Flask web app delivering personalized movie suggestions in real time for users.
