SUMMARY

Data science undergraduate with experience in Python, Excel, and statistical analysis. Skilled in collecting, cleaning, and analyzing large datasets to identify trends, optimize processes, and deliver actionable insights. Interested in applying data analytics and industrial engineering principles to improve operational efficiency in fast-paced environments.

EDUCATION

University Of California, San Diego | Halıcıoğlu Data Science Institute

San Diego, CA

Bachelor of Science in Data Science | Minor in Cognitive Science

Expected June 2027

- **Relevant Coursework:** Machine Learning, Data Structures & Algorithms, Probability & Statistics, Linear Algebra, Data Visualization, and Computational Data Science

WORK EXPERIENCE

Code Ninjas Northridge

Northridge, CA

Coding/STEM Instructor

June 2025 – August 2025

- Designed and delivered project-based lessons in Python, HTML, and JavaScript for 60+ students, adapting technical concepts to diverse skill levels.
- Collected and analyzed student performance data to identify trends and adjust teaching strategies, improving engagement and learning outcomes.
- Collaborated with instructors to streamline curriculum delivery, optimizing workflow efficiency.
- Gained experience in project tracking, reporting, and cross-functional teamwork.

TECHNICAL PROJECTS

Image & Audio Processing Pipeline | Python | La Jolla, CA | Feb 2025 – Mar 2025

- Developed an object-oriented processing system to transform images (grayscale, negate) and audio files (reverse, slow down), emphasizing modular and reusable code design.
- Implemented a K-Nearest Neighbors (KNN) classifier using Euclidean distance to predict image labels, achieving high classification accuracy.

UCSD Lecture Attendance Analysis | Python, Sentiment Analysis | La Jolla, CA | Nov 2024 – Dec 2024

- Scraped Reddit and CAPE forums using Pandas to collect course-level sentiment data related to attendance policies
- Applied VADER sentiment analysis to assess student attitudes and visualized correlations between mandatory attendance policies and average GPA.

ACTIVITIES

Women in Computing at UC San Diego

La Jolla, CA

Member

September 2024 - Present

- Collaborated with peers and professionals to promote gender equity and representation in STEM fields through events and workshops.

Data Science Student Society

La Jolla, CA

Member

September 2024 - Present

- Participated in hands-on workshops covering Python, machine learning, data visualization, and AI fundamentals, building technical skills applicable to research and internships.

SKILLS & INTERESTS

Technical Skills: Python, Java, HTML, JavaScript, Jupyter Notebook, VS Code
