EDUCATION

University of California, Irvine (UCI) Irvine, California	Expected 2027
Computer Science B.S. GPA: 3.40	
Irvine Valley College (IVC) Irvine, California	June 2022 - May 2025
Economics A.S. GPA: 3.92	
USC Viterbi School of Engineering Los Angeles, California	Summer 2024
Artificial Intelligence & Semiconductors Summer Program	

TECHNICAL SKILLS

- **Languages:** Python, C, C++ , Java, JavaScript, HTML, SQL, R
- **Tools & Services:** AWS, Firebase, Stripe
- **Frameworks & APIs:** Django, Flask, Pygame, FastAPI, OpenAI API, VAPI API, Anthropic API, RESTful APIs
- **Databases:** SQLite, MySQL, PostgreSQL

RELEVANT EXPERIENCE

UC Investments Academy UCI Irvine, CA	June 2025 - Present
- Current member of UC Investment Academy; completing 30+ hours of investment analysis & personal finance training with UC Investments professionals. - Participated in workshops and networking with industry practitioners, gaining insights into asset management careers and market trends.	
Computer Science Club President IVC Irvine, CA	Aug 2025 - May 2025
- Led strategic planning, outreach, and logistics for 20+ technical events, including guest speakers and development workshops. Events involved the fields of CS, AI, Data Science, and Game Development. - Managed club budgeting and facilitated growth in active membership. Increased members by nearly 30% ;from 700+ to 900+ members.	
Intel Student Ambassador Intel Corporation Irvine, CA	Aug 2025 - May 2025
- Developed in-depth proficiency with Intel's technical stack (e.g., Intel® Developer Cloud services, AI/ML frameworks) and applying these tools to personal R&D projects. - Organized and led an on-campus educational workshop, introducing peers to Intel's software ecosystem, guiding them through hands-on integrations, and helping optimize their code for improved performance.	

PROJECTS

Comparative Machine Learning Analysis UCI ML Repository	January 2026 - Present
- Collaborating in a four-person team to implement and evaluate a suite of classification models including k-Nearest Neighbors (kNN), Logistic Regression, and Feedforward Neural Networks using large-scale such as Diabetes (130-US Hospitals) from the UCI Machine Learning Repository. - Designing a robust experimental pipeline in Python using scikit-learn and PyTorch to perform hyperparameter tuning, analyze learning curves, and conduct error analysis to optimize model accuracy and reproducibility.	
Custom Search Engine & Web Crawler UCI Information Retrieval	January 2026 - Present
- Architecting an end-to-end information retrieval system from scratch, featuring a high-concurrency Web Crawler, a text-processing pipeline, and a custom ranking engine.
