EDUCATION

University of California San Diego

Bachelor of Science in Data Science, Minor in Linguistics

San Diego, CA

Expected Graduation: June 2027

WORK EXPERIENCE

Student Advocate

UC San Diego - Associated Students, Office of Student Advocacy

November 2025 - Present

- Serve as a student advocate by offering individualized support, safeguarding FERPA-protected information, and guiding students through academic integrity and student conduct processes.

PROJECTS

Scripps Institution of Oceanography | Harmful Algal Bloom Forecasting

Project Member

January 2025 - October 2025

- Collaborated in a team of four to develop an EDM-LSTM (Empirical Dynamic Modeling – Long Short-Term Memory) ensemble model in PyTorch using 4,200+ oceanographic datapoints to forecast Harmful Algal Bloom (HAB) events.
- Achieved 0.75 AUC-ROC for bioluminescence forecasting, improving predictive accuracy for algal bloom events; co-authored a research paper for submission to academic conferences.

Glu-coaster: An Interactive Journey Through Glucose Management

Project Member

May 2025 - June 2025

- Built an interactive website using HTML and D3.js with CGMacros data to visualize meal nutrients and glucose responses from continuous glucose monitors.
- Designed nutrient bar charts, glucose line charts, and a side-by-side meal comparison tool with color-coding, tooltips, and annotations to help users connect meals to glucose trends for diabetes and prediabetes awareness.

FitSync

Project Member

April 2025 - June 2025

- Constructed a fitness web app in React.js, OpenCV, MediaPipe, and TypeScript with 12 exercises across three difficulty levels, featuring side-by-side reference videos and live pose tracking.
- Processed limb vector data to deliver cosine similarity-based accuracy scores, with Supabase authentication and personalized exercise sets.

Dance Battle AI

Project Member

April 2025

- Co-developed with a team of four to ideate, build, and live-pitch a multiplayer full-stack web app within 24 hours, using MediaPipe and OpenCV for real-time dance battle gameplay.
- Won 1st place in the Intermediate Track, outperforming 140 participants at the Data Science Student Society's annual hackathon.

LEADERSHIP & INVOLVEMENT

Women in Computing (WIC)

Secretary

April 2025 - Present

- Develop, code, and debug Google Apps Script automations to streamline Google Sheets workflows, improving data accuracy, reporting efficiency, and operational tracking.
- Manage records for 180+ members and oversee logistics for 150+ annual events, including communications, room reservations, and platform coordination.

IEEE-Eta Kappa Nu (HKN)

Public Outreach Chair

February 2025 - Present

- Organize campus tours for 300+ students, fostering STEM interest and expanding access to higher education opportunities.

Empowerment & Development for Girls in Engineering (EDGE)

Public Relations and Marketing Chair

October 2024 - Present

- Increased event participation by creating Canva content for Instagram (630+ followers, 5,000+ views) and mentored high school girls pursuing engineering.

SKILLS

- Python, HTML, SQL, Regex, NumPy, Scikit-Learn, BeautifulSoup4, Jupyter Notebook, MediaPipe, OpenCV, D3.js, Supabase, Canva, Git, GitHub, Google Workspace (Docs, Sheets, Drive), Data Visualization, Communication, Organization, Team Collaboration, Public Speaking, Social Media Marketing, Strategic Thinking, Data Analysis, Leadership
