EDUCATION

University of California - San Diego

June 2029

Bachelor's, Data Science (AI/ML Focus) and Mathematics-Economics

GPA: 4.0

- SAT: 1550 (800 Math, 750 Reading)
- Relevant coursework: Micro & Macro Economics, Econometrics, Probability & Statistics, Linear Algebra

PROFESSIONAL EXPERIENCE

University of California - San Diego

San Diego, CA, USA

Research Assistant

September 2025 - Present

- Built an end-to-end Python data pipeline to ingest IMF PortWatch data, generating monthly trade volume time series with seasonal adjustment and shock detection (rolling-Z, 2-sigma) to help analyze economic policy effects across 15 African economies
- Quantified port co-movement with lead/lag correlation matrices; created FX-throughput and currency-port heat-maps, plus export- vs import-driven segment analysis to identify regional trade clusters and select priority corridors for deeper investigation
- Developed reproducible, publication-ready dashboards and visualizations in Jupyter to give stakeholders clear visibility into trends and anomalies and to scale insight delivery across the research team

Sustainable Investment Group

La Jolla, CA

Quantitative Analyst

September 2025 - Present

- Built a Python alt-data pipeline (Google Trends + Yahoo Finance) to model Lululemon demand using share-of-search, OLS revenue linkage ($R^2=0.86$), and LSTM time-series models, applying AI/ML techniques to forecast quarterly performance.
- Co-authored investment theses integrating sentiment, and alt-data dashboards, framing a clear data narrative around growth, risk, and performance, and presented recommendations to the club's investment committee to inform portfolio strategy.

Arko Engineers

Mumbai, MH, India

Summer Intern

June 2024 - July 2024

- Analyzed production data across 3 die-cast lines to identify bottlenecks and waste points, and developed a set of workflow changes aimed at improving throughput and reducing scrap.
- Partnered with floor supervisors and operators to map current-state processes, validate findings from the data analysis, and present practical recommendations for streamlining die-cast operations
- Analyzed production KPIs and recommended process and workflow changes to reduce bottlenecks and support operations reporting for plant managers.

Future Business Leaders of America

Cupertino, CA, USA

Competitor

August 2023 - July 2024

- Management Information Systems (1st State, 8th National) & Database Design (5th State); applied SQL, Access, and enterprise systems concepts to timed business case competitions

Boy Scouts of America

Los Altos, CA, USA

Eagle Scout

March 2018 - April 2025

- Designed and rolled out a leadership-tracking system for 70+ scouts, gathering stakeholder requirements, defining processes, and iterating on the system to improve accountability and engagement.

Swim Zone

Cupertino, CA, USA

Swim Coach & Co-founder

June 2024 - September 2025

- Delivered training programs to 20+ clients and parents, personally driving \$7000 in revenue; Designed progress trackers and held parent updates to build trust and consistency

SKILLS

Data Analytics Tools: Python (pandas, NumPy, scikit-learn, matplotlib), Java, SQL, Jupyter, Microsoft Access

Business and Productivity: Excel, Economic & Investment Analysis
