EDUCATION

University of California San Diego

Bachelor of Science in Cognitive Science

San Diego, CA

Expected June 2027

EXPERIENCE

UX/UI Engineer Intern

Jun. 2025 – Aug. 2025

Gather Social Media Startup

Remote

- Coded front-end in React.js; built event creation, discovery, and “For You” interfaces with Tailwind CSS.
- Designed 50+ Figma wireframes; conducted user interviews and updated UI based on feedback.
- Delivered beta-launch designs that contributed to 1K+ early user sign-ups and improved usability.
- Collaborated with engineers and founders in weekly syncs, translating feedback into design updates.

Marketing Project Manager Intern

Oct. 2023 – Dec. 2023

Noodlelist

Burlingame, CA

- Managed a team of 3 interns, delegating daily tasks and fostering an open, collaborative environment for idea sharing.
- Led a social media campaign to promote product through Thanksgiving recipes; reached 20K+ viewers and increased engagement by 45%.
- Conducted customer interviews to refine content direction, enhance messaging clarity, and strengthen brand visibility.
- Filmed/edited 3 short, engaging, “how-to make” recipe videos; shot multiples professional photos of the recipe dishes with Noodlelist’s product.

Marketing/Web Design Lead

May 2019 – Jul. 2019

Dtech Aviation NPO

Redwood City, CA

- Developed a Next.js parallax-scroll website to showcase initiatives and sponsors, increasing traffic by 120
- Created cohesive branding including logo, colors, and typography; ensured responsive and accessible design.
- Led and mentored a small creative team, coordinating design, marketing, and sponsorship outreach.

PROJECTS

Spotitabs | *Next.js, Node.js, Typescript, SCSS, Git, Spotify API, Moises.AI*

Jun. 2023 – Nov. 2024

- Developed a full-stack web app that integrates Spotify and Moises.ai APIs to auto-generate interactive guitar tabs from users’ playlists.
- Implemented user authentication and dynamic routing in Next.js to display playlists and songs.
- Designed and prototyped responsive UI components in Figma; translated designs into React components with Tailwind CSS.

SnackSnap (Cal Hacks) | *Swift, Gemini AI, Image Recognition, Figma*

Sept. 2024

- Developed a virtual-pet iOS app using Swift IOS, Firebase, and Gemini AI that encourages recycling through gamified virtual pets and photo recognition.
- Solely led front-end development & UI design in a 2-person team; implemented photo capture, item validation, pet feeding, & reward flows.
- Integrated the Gemini AI API into the Swift app for real-time image recognition and stored results in Firebase.
- Designed and presented the prototype at Cal Hacks 11.0; awarded 3rd place overall among 200+ teams.
