EXPERIENCE

Handshake AI

Oct 2025 — Present

Content Quality Analyst Contractor

- Collaborated with leading researchers to refine the capabilities of Large Language Models (LLMs)
- Contributed to testing, evaluation, and contextual improvements in AI systems
- Provided detailed feedback and scoring on confidential AI projects

SKILLS

- Programming Languages: Python (Pandas, Scikit-learn, NumPy, Matplotlib, Seaborn), R (ggplot2, dplyr), SQL, HTML, CSS
- Machine Learning Algorithms: supervised learning (K-Nearest Neighbors, linear regression, random forests, decision trees), unsupervised learning (clustering)
- Familiarity with: AWS, Tableau, Microsoft Excel, C++, Java, JavaScript, Spark/Hadoop
- Soft skills: Quick learner and adapter, work well independently or in teams, strong communicator, detail-oriented, highly organized

PROJECTS

Recipe Length Analysis

May 2025 — June 2025

Data Scientist

- Used Python to clean and analyze a recipe dataset from food.com
- Performed permutation tests on missing values and fairness
- Built a Random Forests Regression model to predict recipe length based on number of steps
- Built cross-validation models to optimize Regression model

Mental Health Clustering Analysis

Apr 2024

Data Scientist

- Used Python to clean and analyze a Kaggle dataset on mental health in the workplace
- Utilized clustering algorithms to identify patterns of mental health struggles
- Compared correlation values through Seaborn's confusion matrix
- Visualized each variable using Matplotlib to determine relevance in regards to clustering

Unicorn Uber App

Mar 2023 — Apr 2023

Full-stack developer

- Hosted static website with Amazon S3 and secured with Amazon CloudFront
- Allowed users to create and verify account information using Amazon Cognito
- Utilized Amazon API Gateway and AWS Lambda to authenticate and allow for user interaction
- Stored ride requests and account information using Amazon DynamoDB

Firestart - AI Camp Guided Internship

Sept 2022 — Nov 2022

Machine Learning Engineer

- Compiled, trained, and tested hundreds of images for a dataset using Roboflow
- Classified real-time photos using Roboflow's pretrained computer vision model
- Utilized Twilio to send SMS notifications and real-time images

EDUCATION

University of California, San Diego

Expected 2027

- Data Science, B.S
- Minor: Business Analytics

De Anza College

June 2022 — June 2024

- Mathematics, AS-T
