EDUCATION

University of California, San Diego

San Diego, CA

Bachelor of Science in Data Science

Sep. 2023 – Jun. 2027 (expected)

- GPA: 3.92; Active member of Eta Kappa Nu (HKN), International Engineering Honor Society
- Relevant Coursework: Web Mining and Recommender Systems, Data Management, Data Visualization

EXPERIENCE

Junior Business Intelligence Analyst

Oct. 2025 – Present

UC San Diego Integrated Procure-to-Pay Solutions

San Diego, CA

- Designed Tableau dashboards by translating procurement KPIs into visual metrics, enabling stakeholders to track financial performance
- Analyzed ad-hoc metrics including supplier payment volume and vendor contacts using Oracle BI and Excel, supporting data-driven operational decisions
- Executed manual dashboard data refreshes following SOPs and validation checks, improving reporting accuracy and system reliability

Social Chair

May 2025 – Present

Women in Computing

San Diego, CA

- Planned and hosted weekly social and community-building events by coordinating logistics and schedules, increasing member engagement and participation
- Managed event budgets and tracked expenses using structured financial planning, ensuring cost-effective and sustainable programming

AI/ML Fellow

May 2025 – Present

Break Through Tech (Cornell Tech)

Remote

- Applied machine learning techniques like classification and regression by training and evaluating models on real-world datasets
- Spearheaded collaborative model development by delegating tasks and integrating contributions to build an AI-driven career recommendation system
- Coordinated project timelines and iterations through structured team workflows, ensuring timely delivery and continuous improvement

Elevate, First Year Explorer Program

Jun. 2024, Jun. 2025

Cognizant

Remote

- Analyzed inclusive workplace strategies through discussions with Cognizant leadership, strengthening understanding of collaborative organizational cultures
- Improved professional communication skills by incorporating recruiter feedback from resume and elevator pitch workshops
- Evaluated early-career pipelines and leadership expectations through panels and mentorship sessions, informing career decision-making

Data Analytics Intern

Jun. 2024 – Aug. 2024

Peopleverse

Remote

- Implemented OCR pipelines to digitize handwritten feedback by converting unstructured text into analyzable formats for 40+ clients
- Integrated NLP-based sentiment analysis (VADER) to quantify feedback trends, identifying 90% positive sentiment
- Documented end-to-end data pipelines and presented insights to management, improving analysis reproducibility

PROJECTS

Personality-Informed Career Recommendation | *Python, NLP, Clustering*

- Partnered with CariCon to design an unsupervised clustering model integrating MBTI personality data and O*NET career attributes
- Preprocessed heterogeneous datasets and selected clustering and NLP techniques aligned with user-centered goals
- Achieved 60% recommendation accuracy through iterative development and stakeholder feedback

Glu-Coaster: An Interactive Journey Through Glucose Management | *D3.js, JavaScript, HTML/CSS*

- Developed an interactive data visualization experience to help users evaluate dietary choices and glucose trends
- Implemented visual encodings and narrative structure using D3.js following data visualization principles
- Translated complex health data into accessible insights for non-technical audiences

Compost Initiative Analysis for Solana Center | *Python, pandas*

- Cleaned and analyzed four years of compost bucket weight data, addressing missing values and outliers
- Communicated data-driven recommendations to non-technical stakeholders supporting sustainability initiatives
- Proposed operational improvements projected to increase participation by 30%

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, HTML, CSS

Libraries: pandas, scikit-learn, NumPy, Dask

Tools: Tableau, Oracle BI, Excel, AWS, GitHub, Jupyter Notebook

Awards: Machine Learning Foundations — Cornell & Break Through Tech (July 2025)
