

Anh Ngo Nguyen Tran

(470) 538-4524 | nmt003@ucsd.edu

SUMMARY

Aspiring Data Analyst with a strong foundation in statistics, data analysis, and quantitative problem-solving. Experienced in analyzing real-world datasets using Python, SQL, and R to perform exploratory analysis and build clear, actionable visualizations in Tableau and Excel. Proven ability to translate analytical findings into insights through tutoring, instructional support, and team-based projects. Excited to apply analytical skills to support data-driven decision-making and operational insights.

EDUCATION

University of California, San Diego

Bachelor of Science in Data Science, Business Analytics minor

De Anza College

Associate Degree in Mathematics | GPA: 3.96/4.0

- **Honors:** Dean's List (every quarter)

La Jolla, CA

Expected March 2028

Cupertino, CA

March 2025

TECHNICAL SKILLS

Data Analysis & Reporting:: Python (Pandas, NumPy), SQL, R, Excel, Tableau, Jupyter Notebook, Exploratory Data Analysis (EDA)

Programming: Python, C++, Java

Version Control & Collaboration: Git, GitHub

PROJECTS

Google Reviews LocalLens | *Data Science Student Society at UC San Diego*

Jan. 2026 - Present

- Analyzed 1M+ Google Maps reviews across the United States states using Python and Pandas, uncovering trends in ratings, consumer sentiment, and business categories.
- Preprocessed and cleaned ~10GB of raw data, improving dataset reliability for exploratory data analysis (EDA).
- Developed structured analysis notebooks and GitHub documentation, ensuring reproducibility and enabling collaboration across team members.
- Programmatically visualized trends, identifying top-performing business categories and regional patterns, providing actionable insights for decision-making.

EXPERIENCE

Senior Tutor

Dec 2023 – Mar. 2025

Math, Science & Technology Resource Center

Cupertino, CA

- Analyzed patterns in student learning to identify gaps in conceptual understanding across calculus and statistics topics.
- Reorganized instructional material to emphasize logical flow and underlying reasoning, enabling students to connect concepts into a coherent analytical framework.
- Mentored and trained new tutors, providing feedback on instructional strategies and maintaining academic quality across tutoring programs.

Teaching Assistant

Mar. 2024 – Dec. 2024

Math, Science & Technology Resource Center

Cupertino, CA

- Facilitated one-on-one sessions and structured study groups for calculus and statistics courses.
- Helped students translate theoretical concepts into step-by-step analytical processes, improving problem-solving efficiency and confidence, with many achieving A-level grades and demonstrating up to ~40% improvement in learning performance.

Course Notes Contributor

Jan. 2025 – May. 2025

Math 2A & 2B – Linear Algebra & Differential Equations

Cupertino, CA

- Created structured course notes later adopted by instructors for instructional use.

LEADERSHIP

Club Co-President

Jun. 2024 - Mar. 2025

Mathematical Investment and Trading Society (MITS)

Cupertino, CA

- Directed a student club with seven officers, organizing meetings and events while engaging 20–30 new members each quarter during Club Day.
- Organized and led a Stock Analysis Competition with 10 teams and 4 judges, coordinating logistics and cross-club collaboration to evaluate and compare stocks of large-cap public companies.
