Education

University of California, Berkeley — *B.A. Molecular Biology / B.S. Data Science* Aug 2024 – May 2028
GPA: 3.82 / 4.00

Experience

COPE Health Scholar — *Kaiser Permanente, Woodland Hills* Jun 2025 – Present

- Delivered direct patient support across 5+ clinical departments including emergency, surgical, and outpatient units, accumulating 100+ hours of hands-on clinical experience.
- Responded to call lights and assisted nursing staff with vital sign monitoring, patient mobility, and discharge preparation, improving unit workflow efficiency.
- Collaborated with interdisciplinary care teams of physicians, nurses, and technicians to coordinate patient-centered care during high-volume shifts.

Finance Director — *ASUC Berkeley, South Asian Ad Hoc Office* Aug 2025 – Present

- Directed annual budget of \$10K+ for a university-recognized student government body, overseeing fund allocation, expense tracking, and vendor payments.
- Spearheaded fundraising campaigns in partnership with campus organizations, increasing funding pipeline and ensuring 100% financial transparency through detailed reporting.
- Collaborated with a 10-member executive team to align financial strategy with programming goals for **500+ constituents**.

Finance Director — *South Indian Society, UC Berkeley* Sept 2024 – Present

- Managed end-to-end budgeting, reimbursements, and vendor negotiations for a 100+ member cultural organization.
- Redesigned financial tracking systems by implementing standardized spreadsheets and approval workflows, reducing reimbursement processing time by 40%.
- Led fundraising initiatives that increased organizational funding, enabling expanded event programming across 2 semesters.

Projects

Canvascope — **Privacy-First Academic Search Engine** canvascope.org

Founder & Lead Developer

- Built and launched a Chrome extension that indexes Canvas LMS content, enabling students to search across all courses, assignments, and files in **under 1 second**.
- Engineered a custom search algorithm with fuzzy matching, abbreviation expansion, and relevance scoring using JavaScript, achieving **sub-100ms** query response times.
- Scaled to **10+ university domains** with a modular architecture; grew to **50+ active users** within the first week of launch.
- Ensured full data privacy — all processing runs locally with zero external API calls or telemetry.

ChemTutor

Python Developer

- Developed an interactive Python tutoring program covering acid-base chemistry and thermodynamics with **50+ adaptive practice problems** and targeted misconception feedback.

BillSplitter

Web Developer

- Designed and built a responsive web application for splitting group expenses, supporting itemized bills, tax/tip calculations, and multi-user settlement tracking.

Technical Skills

Languages & Tools: Python, SQL, JavaScript, HTML/CSS, Git/GitHub

Data Science: Data Analysis, Data Visualization, Pandas, NumPy, Jupyter Notebooks

Productivity: Microsoft Excel (Pivot Tables, VBA, Advanced Functions), Google Workspace
