Financial accounting basics

Assisting accountants or supervisors

Basic data tools

Negotiation

Critical Thinking

Following instructions and procedures

Numerical accuracy and attention to detail

Confidentiality with financial data

Rita Yang

Math department:
Statistics & Probability

Experience

2021-2025

STUDENT AMBASSADOR

As a student ambassador, I contributed to providing the truest perspective of school to new parents and students. Through my involvement in this top-level school organization, I developed **strong communication skills** while effectively **assisting the principal** and **supporting team members**, strengthening my ability to collaborate and help others succeed.

2022-2025

LEADER OF CHARITY ORGANIZATION "LOVE"

LOVE is a student-run organization dedicated to supporting underserved communities through volunteer work and charitable initiatives. As the founders of the association, I **planned and organized** charity sales for children with additional needs. Additionally, I **managed fundraising budgets, allocated resources, and tracked the expenses** to support programs for children with special needs. Through our efforts, we not only raised funds but also raised awareness of the challenges faced by disadvantaged populations.

2025

DATA SCIENCE

Through a data science camp, I learned the complete process of **data analysis**, from data collection and cleaning to visualization and interpretation, using both Excel and statistical software (SPSS and R). Additionally, coursework in statistics and data science has strengthened my efficiency in **handling quantitative and number-driven tasks**.

2023-2025

TUTOR IN MATH ORGANIZATION

Provided individualized instruction in AP Calculus AB and BC to students seeking support in calculus. **Assisted students in understanding** not only how to solve specific problems, but also the underlying concepts and logical reasoning behind them. Introduced advanced or unfamiliar topics as needed to strengthen their overall comprehension. Several students achieved scores of 4 or 5 on the AP Calculus BC exam as a result of my tutoring. Through tutoring, I developed **strong problem-solving skills**, which are **useful in ticket resolution**, and further **strengthened my mathematical abilities**.
