EDUCATION

University of California, San Diego

Expected Graduation: December 2027

B.S. in Computer Science, GPA: 4.0/4.0

San Diego, CA

- **Coursework:** Design and Analysis of Algorithms, Advanced Data Structures, Computer Organization, Systems Programming and Software Tools, Discrete Mathematics, Linear Algebra, Statistical Methods.
- **Awards:** 25–26 CRA REU Grant Recipient (Engineers for Exploration, UCSD); 24–25 CSE Alumni Advisory Board Leadership Scholarship Recipient (CSE Department, UCSD)

PROJECTS

SnapChef ([Github](#) 🔗, [Devpost](#) 🔗) | *LangChain, Node.js, Google OAuth2, FastAPI*

January 2026

- Developed a pantry-to-recipe video kitchen assistant in SanD Hacks 2026, placing 4th overall
- Implemented object detection pipeline for ingredient identification using Eyepop.ai
- Orchestrated a consensus-based five-agent framework, ensuring that users received appropriate video recommendations

SuperSet ([Backend](#) 🔗, [Frontend](#) 🔗) | *MongoDB, React native, Express.js, Node.js, Typescript*

- Implemented a full-stack personalized workout app with social media features
- Developed 60+ RESTful API routes to support privacy controls, posting, and complete authentication
- Utilized modular components to design guided video instructions for 1,500+ exercises, live workout page, and social interaction features, fostering a supportive workout community

EXPERIENCE

KeyBank

June 2026 – September 2026

Incoming App Development Intern

San Diego, CA

Engineers for Exploration

September 2024 – Present

Undergraduate Researcher

San Diego, CA

- Reengineered existing model training pipeline using Audiomentation, Librosa and PyTorch, improving bird recognition in noisy environments (domain shift) like the Peruvian Amazon
- Implemented bayesian hyperparameter sweeps to identify optimal augmentation parameter combinations
- Pioneered integration of Meta's Segment Anything model to increase classification accuracy by 5%

Google Basta Software Engineering Program

July – September 2025

Participant

- Selected as one of 219 students from 2,600+ applicants for a 10 week mentorship with a Google Software Engineer focused on improving data structures and algorithms, and technical interview prep

Eta Kappa Nu – UCSD

February 2026 – Present

CSE Chair

San Diego, CA

- Responsible for planning and delivering technical events to undergraduate students

LEADERSHIP

Teaching and Learning Commons

September 2025 – Present

Content Tutor

San Diego, CA

- Lead 10+ hours of weekly group and individual sessions for undergraduate students in topics of Linear Algebra, Calculus, and Physics

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, Typescript, ARM

Frameworks: React/React Native, Node.js, Express.js, JUnit

Tools: Git, MongoDB, Langchain, Jupyter, Linux, Huggingface, Google API, Valgrind

Libraries: Numpy, PyTorch, Audiomentations, Pandas, Matplotlib
