EDUCATION

University of California San Diego
Bachelor of Sciences in Data Science

San Diego, CA
Aug. 2025 – June 2029

EXPERIENCE

Intern for Bytes and Bots
Bytes and Bots

June 2024 – August 2024
Irvine, CA

- Facilitated hands on learning for elementary school kids about programming, robotics models, and designs
- Mentored kids while they worked in groups to prepare for FIRST Lego League competitions
- Managed teams' completion of tasks and objectives, as well as inventory management and cataloging robot components

Team Captain and Member of FRC Team 7230
Mythic Mechanix

September 2023 – June 2025
Irvine High School, Irvine, CA

- As Team Captain, led team of 50 in building a robot to compete in competitions with thousands of teams from around the world
- Got teacher support for club, set schedule to plan for whole season, managed team of 50, ensured attendance and removed members when necessary, made strategic decisions for robot design off of split second changes, managed subteams and subteam coordination, as well as scouting and strategy at OC Regionals
- Led team to best season in its history, placing 8th place at OC Regionals, becoming alliance captains, and winning a playoff match, all of which we had never done

PROJECTS

Analyzing Risk Factors for Coronary Heart Disease | R

June 2025 - July 2025

Donald Bren School of Information and Computer Sciences at UCI

- * Worked in a group of 4 coding in R with RStudio using the Framingham Heart Study database to analyze risk factors of coronary heart disease
- * Used statistical inference and analysis methods to weigh factors like age, total cholesterol levels, systolic blood pressure, glucose levels, BMI, and more
- * Presented our findings to an audience of over 100 people

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS, R

Frameworks: React

Developer Tools: Visual Studio Code, WPILib VS Code

Libraries: babypandas, NumPy, Matplotlib
