EDUCATION

University of California, San Diego

B.S. in Data Science, Minor in Technology, Innovation, and Supply Chain

Honor(s): Provost Honors, Halicioglu Data Science Institute Scholarship Awardee

San Diego, CA

Sep. 2023 – Mar. 2027

EXPERIENCE

Undergraduate Researcher

Oct. 2024 – Present

University of California, San Diego (with Prof. Ben Smarr and Conan Minihan)

San Diego, CA

- Currently researching on quantifying and comparing media sentiments against real-life sentiments of crime in California
- Investigated the impact of crime-related and non-crime-related policies on incarceration and crime rates in California from 1980 to 2020, ensuring meticulous bias considerations in data analysis
- Language: Python, Data collection: BeautifulSoup and Selenium, EDA: Pandas, Matplotlib, Plotly

AI Engineer Intern

June 2025 – Aug. 2025

Quantum Teknologi Nusantara

Jakarta, ID

- Implemented LangChain and LangGraph using MCP framework to build Quantum's B2C AI graphic designer
- Implemented RAG to improve AI sales and lead conversion capabilities by 40% and increased user satisfaction by 30% through customizing Meepo's existing AI design pipelines using Python and improving existing prompts
- Cut costs by 40% through cleaning Meepo's codebase and existing AI workflows, optimizing token usage

PROJECTS

Food Data Analysis | *Python, Pandas, NumPy, Matplotlib, scikit-learn*

Jan. 2025 – Feb. 2025

- Built an end-to-end data analysis pipeline using Python (pandas, NumPy, scikit-learn) to clean, merge, and explore 800,000+ Food.com recipe and interaction records, uncovering key factors influencing calories and ratings
- Conducted exploratory and inferential analyses (visualized with Matplotlib & NumPy) including permutation tests, missingness analysis (MAR/NMAR), and hypothesis testing to identify statistically significant relationships among recipe attributes
- Developed and optimized predictive models (Linear Regression & Random Forest Regressor) using scikit-learn, improving MAE by 13% and performing fairness evaluation via permutation-based MAE comparison between simple and complex recipes

Order Management System | *HTML, CSS, PHP, MySQL*

Nov. 2022 – May 2023

- Designed and programmed a web-based order management system that integrated searching, sorting and Object Oriented Programming
- Utilized HTML, CSS, and Bootstrap for the front-end programming of the system, PHP, and MySQL for the back-end programming of the system

I'm Bored | *HTML, CSS, JavaScript*

June 2023 – July 2023

- Designed and built a fun Chrome Extension using HTML, CSS, and JavaScript. A single click leads you to a randomized fun, interactive, odd, weird, or wacky page to cure boredom
- Used & downloaded by 1500+ Chrome users, 4.7 out of 5 rating by 10 reviewers

LEADERSHIP

Data Science Student Society | *DataHacks Co-Director* ← *Consultant*

March 2025 – Present

- Spearheading UCSD's biggest annual data science hackathon with 200+ participants, \$5,000+ in funds, and 20+ team members in collaboration with The Basement and Halicioglu Data Science Institute
- Provide data analytics services for Solana Center, testing whether bucket weights changed with times of visits through correlation analysis and Exploratory Data Analysis

GenDigital Academy | *Curriculum Advisor* ← *Curriculum Head* ← *Member*

March 2022 – March 2025

- Planned strategies and insights to grow digital literacy teaching audience to 6,000+ digital learners
- Interviewed experts and performed extensive market research in expanding curriculum towards Gen. AI and LLMs, opening AI education for 2,000 digital learners in 2025 in Southeast Asia
- **Awards:** Biggest Digital Literacy Teaching Session in Indonesia, ASEAN+ Youth Summit 2023

SKILLS

Languages: Java, Python, JavaScript (D3, Reveal), SQL (Postgres, MySQL), HTML/CSS

Developer Tools: Git, Docker, Visual Studio Code, Cursor

Libraries: pandas, NumPy, Matplotlib, scikit-learn, Plotly

Soft Skills: Leadership, Team Management, Problem Solving, Adaptability, Project Management, Communication
