

Will Shin

(657) 550-3235 | wishin@ucsd.edu | [Linkedin](#) | [Github](#) | La Jolla, CA | U.S citizen

EDUCATION

University of California San Diego

Graduation: June 2027

*Bachelor of Science in **Data Science**, Minor in **Mathematics***

La Jolla, CA

- **Relevant coursework:** - Theoretical Foundations of Data Science, Statistical Programming, Probability, Data Structures and Object-Oriented Design, Computational Stochastics
- **Achievements:** 1st in Block-O-Graphy AI hackathon at UC San Diego Qualcomm Institute

EXPERIENCE

Butterflo Inc.

Jun 2025 – Dec 2025

Data Scientist & Engineer Intern

San Francisco, CA | Remote

- Automated a large-scale real estate data pipeline processing 30k+ metro-level records across 700+ neighborhoods, transforming raw census and economic indicators into investment-ready features.
- Engineered ETL workflows in Python to analyze income, growth, inflation, and demographic trends, enabling users to evaluate real estate assets as a quantitative investment framework using stock-market-style comparative metrics.

RoomieMatch

Nov 2025 – Present

Machine Learning Engineer

San Diego, CA

- Developed a roommate recommendation system using scikit-learn, applying K-means clustering, feature scaling, and bootstrapped similarity scoring to model user compatibility.
- Integrated model outputs into production pipelines supporting Roomie.ai's matching logic.

QuantConnect Research Group at UC San Diego | *Python & Java*

Sep 2025 – Present

Quantitative Researcher (Algorithmic Trading & Financial ML)

La Jolla, CA

- Researching cross-sectional equity and ETF strategies using QuantConnect's institutional-grade backtesting platform.
- Engineering predictive features (overnight returns, volatility regimes, volume signals, sector-normalized factors) for short-horizon return forecasting.
- Evaluating ML-driven alpha signals (LightGBM, Random Forests) with walk-forward and rolling-window validation under transaction-cost constraints.

BrainPocket

Oct 2024 – May 2025

Full-Stack Developer

Irvine, CA

- Built a production web application supporting structured note-taking with calendar views, tagging systems, and advanced search.

PROJECTS

Blockography.AI | *Python*

Nov 2025

- Built an image classifier identifying Minecraft biomes from gameplay screenshots using **Random Forest** and **XGBoost**; achieved **92% accuracy** and **1st place** at UCSD Qualcomm Institute.

Global Development Markov Analysis | *Python, pandas, Plotly, Streamlit*

Sep 2025 – Dec 2025

- Built a probabilistic Markov-chain model to analyze global development transitions using multi-indicator composite scores and categorical state.

LEADERSHIP

Peer Tutor

Aug 2023 – Sep 2025

- Tutored 30+ peers in linear algebra, multivariable calculus, SQL, and Python; simplified complex topics into intuitive concepts, improving student outcomes in STEM related AP and college level courses.

CERTIFICATIONS & SKILLS

Certifications: Google Data Analytics Professional Certificate (Issued Aug 2024)

Skills: Python (pandas, NumPy, matplotlib), Java, MySQL, R, Streamlit, Microsoft Suite
