EDUCATION

University of California, San Diego

Bachelor of Science in Data Science, Minor in Cognitive Science

Sept. 2024 – Present

La Jolla, CA

EXPERIENCE

Marketing Intern

Y Montessori

Oct. 2024 – Mar. 2025

San Diego, CA

- Prepared weekly content related to the associated company app and Montessori education.
- Tasks included editing, filming, compiling footage, and interacting with Montessori educators through various social media platforms.
- Promoted DataLens program and performed data analysis for social media and other Montessori related assets.

Kodely Leader

Kodely

June 2025 – July 2025

CA – Multiple Locations

- Foster a collaborative and organized environment that encourages student growth, mending any interpersonal conflict between students.
- Facilitate creative, STEM-based learning and collaboration between students of different ages.
- Maintain supplies, classroom cleanliness, and communication with parents, school staff, and support team.

Medical Receptionist

Valley OBGYN

July 2024 – Sept. 2024

Hemet, CA

- Handled insurance calls and verified patient insurance information.
- Communicated effectively with working nurses, medical assistants, and support team.
- Scheduled appointments, registered patients, conducted pregnancy tests, and provided customer service to patients.

PROJECTS

Dietary Trends and Carbohydrate Analysis | *Python, Git*

November 2025 – December 2025

- Investigated dietary trends that occurred between the years of 2008 to 2018, conducted hypothesis and permutation tests.
- Explored the relationship between carbohydrate content and recipe ratings and developed a final prediction model.

XarraySQL | *Python, SQL, Git*

January 2026 – Present

- Contributed to XarraySQL, an open-source Python library for SQL-style querying over multi-dimensional scientific datasets.
- Fixed bugs and improved documentation, gaining hands-on experience with high-dimensional data, xarray operations, and open-source collaboration workflows.
- Developed example queries and Jupyter notebooks demonstrating climate, vegetation, and geospatial data analysis.

TECHNICAL SKILLS

Languages: Java, Python, HTML, SQL

Libraries: pandas, NumPy, Matplotlib, Plotly, Seaborn, Scikit-learn, Beautiful Soup

Productivity: Excel

Relevant Coursework: Object-oriented programming, data structures, graph theory, empirical risk minimization, optimization, regression, classification, discrete probability, k-means clustering, neural networks, natural language processing (TF-IDF), relational data modeling and schema design

Additional Skills: Piano (advanced), music theory, accompaniment, personalized art business (commissioned artwork)
