

EDUCATION

University of California, San Diego | Cumulative GPA 3.72

La Jolla, CA

Bachelor of Science: Data Science

June 2027

Relevant Coursework: Data Structures & Algorithms (Python), DSC10, DSC20, DSC30, DSC40A,
(Concurrently: DSC80, DSC40B)

EXPERIENCE

Norco College Counseling | *IT Front Desk* | Norco, CA

May 2023 - June 2025

- Assisted more than 500+ students with IT related issues, navigated websites Edunav, MyPortal, troubleshooted laptops, desktops and password resets
- Performed data entry through SARS Anywhere and Microsoft Excel, ensured counselor scheduling was accurate and running at peak efficiency
- Mentored 50+ incoming students through personal experiences and acclimating them to college life, providing essential guidance to their journey, contributing to their academic success

Norco College Outreach | *Outreach Aide I* | Norco, CA

July 2023 - June 2025

- Represented Norco College and advocated for the community college path at career fairs, high schools and Riverside City College events
- Tour guide for 100+ guests during Norco College visitation days for various groups including high school, elementary school, and students with disabilities
- Setup outreach activities for incoming students ensuring guests are well accommodated and delivered speeches at peer panels

PROJECTS

MVC MakersSpace Machinery Operations | *Python Analytical Project* | Moreno Valley, CA

Aug 2024 – Sept 2024

- Collaboration with the MVC MakersSpace to research community overutilization of machinery problem within the space
- Gathered 200+ survey responses and performed statistical analysis in Python (Pandas) with the Data Science team, confirming that vinyl sticker printers were being overutilized based on elevated average usage rates by 21% within the data
- Presented the issue with our findings through clear data visualizations created from Python and advocated for addition of more vinyl sticker printers at the community board meeting which resulted in the funding approval for 2 vinyl sticker printers

Global Data Analysis and Visualization | *Data Analysis Project* | Moreno Valley, CA

Sept 2024 – Oct 2024

- Analyzed global datasets with 5,000+ data points to explore trends in population growth, fertility rates, mortality rates and poverty levels across different countries and time periods
- Utilized data wrangling and statistical analysis techniques to clean, process, and extract insights from datasets combined with external research to contextualize abnormalities such as the case for Bangladesh 16.5% mortality spike in 1970
- Developed visualizations using Python to identify mortality rate abnormalities and communicate findings effectively to peers

LEADERSHIP & PERSONAL DEVELOPMENT

California College Corps | *Fellow* | Norco, CA

August 2023 - June 2024

- Brought awareness to food insecurity on campus through outreach initiatives and volunteered at the Basic Needs and Wellness Food Pantry assisting with tabling, clothing drives and farmers markets (400 hours)
- Helped 100+ students with food insecurity, handing out groceries and living essentials.
- Led pantry food van deliveries to and from Feeding America food bank ensuring pantry is fully stocked

- Volunteered to assist with (0.5) acres of fire prevention yard work, weeding, trimming, and wood cutting for disabled individuals from the Norco Community

SKILLS

Languages: Bilingual in English and Mandarin

Programming Languages: Python, C++, Java

Libraries: Pandas, Matplotlib, NumPy
