

School

AT, 34 ACT, 4 Gold President's Volunteer Service Awards, National AP Scholar with Distinction

SKILLS

Python, Java, MatLab, O.O.P., SQL

Git/GitHub, Pandas, NumPy, Matplotlib, DSPy, Excel

July 2023

g Research Intern

and researched a natural language processing system using **DSPy** modules, Open AI LLMs, and
to extract numerical data from financial documents and execute multi-step mathematical com
validation dataset scenarios in **JSON/YAML** format containing **100+ numbers** and **500+ wor**
multi-step conditional algebra, averages, percent changes, and weighted metrics
ned **90+% accuracy** in extracting relevant data and **95+% accuracy** in performing calculations
being built into production by company execs

Oct 2023

olunteer

ean **implication analysis** to research the relationship between genes and their expression under
tifying biomarkers for various diseases and cancers
processing and analyzing genomic datasets, including RNA-seq and transcriptomic data, using
and biological domain knowledge

dent Association

Sept 2023

Analytics Competitor

analyzed **10,000+** of rows of data on literacy levels in America using Excel and Jupyter Noteb
hours a week for a month to work with team on completing the project
resented a [research paper](#) and poster on the topic to judges at the Washington State TSA Con
6th overall in state out of 22 teams

PROJECTS

ng Recommender

ge dataset of popular songs and Taylor Swift songs using **Pandas** and **Python**
n that recommends user's top 5 Taylor Swift songs based on an input song using Euclidean D
deling

t Predictor

riends" TV show dataset using **Pandas** and **Python**
esis testing, data visualization, and predictive modeling on viewership data, ratings, and more to
ful qualities of a potential show reboot such as season length, episode director, and episode ti
