

Alexander Chin

 Alexander Chin |  azchin@ucsd.edu |  (415) 688-9097

EDUCATION

University of California - San Diego

B.S. Mathematics-Computer Science

City College of San Francisco

A.S. Mathematics with Highest Honors

La Jolla, CA

Aug. 2025 – Jun. 2027

San Francisco, CA

Aug. 2024 – June 2025

EXPERIENCE

Research Intern

University of California - San Diego

Aug. 2025 – Sep. 2025

La Jolla, CA

- Studied and implemented fundamental aspects of Gradient (BLS, Momentum) to to optimize data sets and minimize loss landscapes.
- Created a machine learning model for classification and clustering using Numpy, Pandas, and Pytorch

NASA Community College Aerospace Scholar

National Aeronautics and Space Administration

Jan. 2025 – Apr. 2025

Remote

- Collaborated with a cohort of 12 students to prototype a full launch schedule and mission timeline for a Mars Rover Mission for NASA Goddard Space Flight Center
- Conducted data analysis of telecommunication methods to determine optimal equipment for voyage and radiation testing experiments

Operations Data Manager

LionDanceME

Mar. 2023 – July. 2025

San Francisco, CA

- Coordinated and scheduled 300+ annual performances, scaling operations to manage 10+ teams during Chinese New Year season.
- Designed and implemented an automated attendance system logging over 1,400+ events and reducing manual workload.
- Managed and coordinated the logistics for practices over school breaks, scheduling around 100+ members availabilities.

Academic Tutor

City College of San Francisco

Jan. 2025 – Jun. 2025

San Francisco, CA

- Tutored 20+ students weekly on topics in calculus and physics
- Provided one-on-one academic support to improve student comprehension and performance
- Worked with professors to coordinate host office hours for students

PROJECTS

TroupeRoute | *Python, H3, Geocoding API, Pandas, HTML/CSS, React*

Aug. 2025

- Built a constraint-based optimizer to schedule multi-team lion dance performance schedules under travel-time, equipment, and rest-break constraints.
- Implemented geographic clustering (H3) and modeled travel with Haversine distance and time-of-day multipliers to assign shows without time overlap.

webregICS | *Python, OCR*

Aug. 2025

- Built a Python tool that converts UCSD WebReg schedule PDFs into standards compliant .ics calendar files using OCR and structured parsing.
- Automated generation of recurring lectures, holiday skipping, and one off midterm and final events, producing calendars compatible with Google, Apple, and Outlook.

TECHNICAL SKILLS

Languages: Java, Python, SQL, Git, HTML/CSS, Matlab, Excel

Soft Skills: Communication, Teamwork, Problem-Solving, Leadership, Time Management

Coursework: Data Structures & Algorithms, Statistics, Computer Architecture, Optimization, Linear Programming, Machine Learning, Stochastic Processes

Libraries: Pandas, NumPy, Matplotlib, Pytorch
