EDUCATION

UCSD: B.S. in Mathematics-Computer Science, Minor in Cognitive Science San Diego, CA
GPA: 3.9 March 2027

EXPERIENCE

Research Assistant Jan 2026 – Present
Systems Neuroscience Lab - Cognitive Science Department San Diego, CA

- Created immersive 3D VR environments for cognitive science research, focusing on how visual hierarchy, spatial affordances, and environmental cues shape user navigation and mental models

Marketing Director June 2025 – Present
Data Science Student Society Executive Team (DS3) – UC San Diego San Diego, CA

- Led end-to-end design of digital marketing assets by translating event goals into clear visual hierarchy and user-centered messaging across Instagram, LinkedIn, and Discord
- Iterated on content strategy using engagement analytics and audience behavior insights, increasing total following by 40% and doubling average post engagement within one quarter

UX + Web Designer Intern August 2024 – October 2024
ASCENDtials San Diego, CA

- Redesigned 95% of the organization's website by identifying usability issues and restructuring navigation, layout, and content hierarchy to improve clarity and accessibility
- Created high-fidelity wireframes and interactive prototypes in Figma for 10+ pages, establishing a cohesive design system for color, typography, and reusable components

UI Designer + Software Developer October 2024 – Present
DS3 Software Team – UC San Diego San Diego, CA

- Led the redesign and rebranding of DS3's main and consulting websites, designing 20+ responsive pages with consistent visual hierarchy, accessibility standards, and scalable UI patterns
- Facilitated technical and design workshops for 80+ students, teaching version control, deployment workflows, and collaborative development practices

PROJECTS

Study Buddy | *Figma, Next.js, Flask, TailwindCSS* June 2025 – October 2025

- Designed an AI-powered learning platform that applies the Socratic method to encourage guided reasoning rather than answer-based learning
- Conducted competitive analysis of AI tutoring tools and translated insights into structured user flows and high-fidelity prototypes to improve engagement and retention

DS3 Website | *Figma, TailwindCSS, React, JavaScript* October 2024 – Present

- Designed and developed 20+ accessible, responsive pages for a student organization serving 500+ users, prioritizing clear navigation and information hierarchy
- Built reusable React components to support scalable UI patterns and long-term maintainability

BiteFresh - Smart Kitchen Assistant | *Swift, Xcode, Google Gemini API* January 2025

- Designed a mobile experience for tracking food expiration and reducing waste, focusing on intuitive scanning flows and glanceable visual feedback
- Integrated AI-powered item recognition to minimize manual input and streamline grocery tracking workflows

TECHNICAL SKILLS

Design: Figma, Wireframing, Prototyping, Design Systems, Accessibility, Responsive Design
Frontend: HTML/CSS, JavaScript, React, TailwindCSS
Research: Competitive Analysis, User Flows, Usability Evaluation
Tools: Git, VS Code, Canva, CapCut
