

Siyu Wu

San Diego, CA 92037 | 304-376-7870 | angw923@gmail.com | US Citizen

Education

University Of California, San Diego | San Diego, CA

Bachelor of Science in Data Science and Cognitive Science, GPA 3.88

September 2023 – Present

Expected Graduation, June 2027

Skills

Programming: Python, Java

Software: HTML, Github, OnShape, Jupiter Notebook

Communication: Marketing/Advertisement, Mentorship, Customer Service

Languages: English (native), Chinese (native), Spanish (novice)

Experience

Fusion Morgantown LLC, Morgantown, WV

2019 – 2023

Restaurant Host and Cashier

- Seat customers, make and manage take out orders, book reservations, answer phone calls, deliver take outs, enthusiastically greet and interact with customers, handle conflicts and cooperate during group efforts, etc.
- Sharpened reaction time and independent, quick judgement/decision making skills while working under a high pressure atmosphere during rush hour.
- Sharpened customer service skills.
- Authorizing payments, managing currency flow, calculating prices.
- Working fast under high pressure atmosphere with many customers.
- Sharpened customer service skills.

Projects

Prosthetic Arm | Neurotech @ UCSD

Member of Machine Learning Sub-Team

Team-based project that combines expertise in machine learning, software/hardware engineering, and data processing to brainstorm, design, code, build, and test a neural prosthetic arm, actuated with surface EMG.

- Learned about different machine learning principles/data training approaches: supervised learning, gradient descent, random forest, etc.
- Applied knowledge on various fields (especially machine learning and cognitive science) to neuroscience and medical advancements.
- Worked as a member of the machine learning subdivision that handles data collection and training AI models.
- Worked with other subdivisions to combine expertise and efficiently implement different components of the arm.

Image/Audio Processing App | DSC20

Lead Designer

Project that uses inheritance to simulate a monetized app and implements a KNN classifier to predict the labels of images.

- Learned how to store and manipulate images/audio with code.
- Learned how RGB values are stored in a 3D array and how images are made up with pixels.
- Implemented KNN classifier to categorize images.

Scrambler | Science Olympiad

Co-Designer and Project Executor

Team-based project to design, build, and test a mechanical device, which uses the energy from a falling mass to transport an egg along a straight track as quickly as possible and stop as close to the center of a Terminal Barrier without breaking the egg.

- Brainstormed blueprint and carried out complex and precise engineering design that included a wing nut stopping mechanism and elastic propulsion system.
- Worked with team member to build time consuming build made of self-sawed wood.
- Placed 12th in the nation, highest among teams from West Virginia.
