EDUCATION

University of California, San Diego

La Jolla, CA

Bachelor of Science in Data Science, Minor in Cognitive Science

Sep. 2024 – Jun. 2028

- Data Structures, Design, Analysis of Algorithms, Computer Organization, Systems Programs, Data Science in Practice, Machine Learning Algorithms

GPA: 3.8

EXPERIENCE

Data Science Intern

Jun. 2025 – Aug. 2025

Southern California Edison

Pomona, CA

- Improved reliability dashboard accuracy (SCE's most-viewed **Power BI** tool) by validating outage records, retracing discrepancies, and correcting automation errors — directly saving **1.24** minutes of the monthly 9-minute reduction goal (**6.58M CMI and 5,703 customers impacted**)
- Developed a Python-based **EPC/DYD parser** that automated manual data review by converting raw energy system files into structured pandas DataFrames; created a lookup function to instantly retrieve key data fields, saving engineering teams significant time and reducing manual error.
- Collaborated with cross-functional engineering and reliability teams to integrate findings into operational practices, supporting company-wide goals of improving outage response and system resilience.

Product Manager

Nov. 2024 – Present

Triton Software Engineering

La Jolla, CA

- Led **client-facing project management** by conducting 1:1 meetings to understand client needs, translate them into technical requirements, and align deliverables with TSE's capabilities.
- Coordinated development team efforts, bridging communication between technical members and clients to maintain clear priorities, realistic timelines, and high-quality outcomes.
- Collaborated with a team of developers to revamp the SpayLA website using the **MERN stack**, ensuring seamless integration and efficient data management and engaging in the software development lifecycle.

Information Technology Intern

Jun. 2024 – Aug. 2024

Port of Long Beach

Long Beach, CA

- Conducted in-depth research on the Port's use of **Darktrace cybersecurity software**; presented findings to the Cybersecurity team and Assistant Director; constructed a formal report on a requested potential software
- **Developed a Python tool** to assess infrastructure impact from a global failure event, tracking offline devices and identifying affected employees to support **incident response**.

PROJECTS

Alzheimer's Prediction Using Socioeconomic and Mental Health Data | *RStudio*

Jul. 2023 – Aug. 2023

- * Applied machine learning and predictive modeling to **predict** Alzheimer's based on socioeconomic factors and mental illness.
- * Used random forest models to identify key factors like depression, severe aggression, and education level.
- * Analyzed UCI's Information and Computer Science's Alzheimer's dataset using **k-nearest neighbor (KNN)**, **random forest**, and **Naive Bayes** models, with KNN achieving **82.1%** accuracy.

TECHNICAL SKILLS

Languages: Java, Python, HTML/CSS, R

Tools: SQL, DarkTrace, Git, VSCode, MongoDB, React, Node, Express, Microsoft Azure, Tableau, PowerBI, Excel, Google Sheets

Libraries: Pandas, NumPy, Matplotlib, SeaBorn
