EDUCATION

University of California, San Diego

La Jolla, CA

M.S. in Computer Science and Engineering, GPA: 4.00/4.00

Expected June 2027

Relevant Coursework: Measure-theoretic probability, Design & Analysis of Algorithms, Unsupervised Learning, Search and Optimization

Purdue University

West Lafayette, IN

B.S. in Computer Science, Minor in Math, GPA: 3.82/4.00

Graduated May 2025

Relevant Coursework: Deep Learning, Statistical Machine Learning, Computer Networks, Operating Systems, Data Structures and Algorithms, Systems Programming; Stochastic Calculus, Mathematical Statistics, Fourier Analysis, Real Analysis, Differential Equations, Linear Algebra, Discrete Math

EXPERIENCE

Software Engineer Intern

June 2026 – September 2026

Atlassian

Bellevue, WA

Software Engineer Intern

May 2025 – August 2025

Garmin

Olathe, KS

- Developed and deployed a scalable microservice using a containerized C# Azure Function App that serves thousands of users, integrating with a cloud-hosted MySQL database to perform data operations via stored procedures.
- Engineered a comprehensive, multi-layered testing strategy, writing automated C# unit tests with function mocking to validate individual function logic and creating JavaScript integration tests with Mocha.js to ensure seamless system performance.
- Architected a portable testing environment using Docker and docker-compose, utilizing API mocking to isolate and verify interactions between containerized services.

Full-Stack Software Developer Intern

May 2024 – August 2024

ITAMCO

Argos, IN

- Developed REST API endpoints in C# using LINQ (Language-Integrated Query) and ASP.NET Core following Model-View-Controller (MVC) design pattern that efficiently query, process and update data from an SQL database.
- Revamped components on web pages and designed new features using JavaScript and HTML/CSS as well as React with TypeScript to enhance user experience.
- Improved functionality of iOS app counterpart of website by modifying existing features and building new ones using Swift and SwiftUI, increasing user productivity.

Undergraduate Teaching Assistant (UTA)

January 2024 – May 2025

Purdue University Department of Computer Science

West Lafayette, IN

- Served as an undergraduate TA for important theory-focused computer science classes at Purdue University (Discrete Math, Data Structures and Algorithms, Analysis of Algorithms) while taking 18-19 credits of classes.
- Held weekly office hours and lead problem-solving/collaboration sessions to deepen students' understanding of course material and aid them in completing challenging homework assignments.

PROJECTS

BoilerAlgorithms | *Python, TypeScript, Django, React.js, HTML/CSS, MongoDB*

- Constructed a website to help Purdue students study for data structures and algorithms in a team of 4 people as a full-stack developer in an Agile development environment.
- Implemented REST APIs for several critical website features such as user accounts and a notification system in Python using Django and a MongoDB database.
- Designed and built frontend components with TypeScript and React, connecting them with the appropriate custom API endpoints.

TECHNICAL SKILLS

Languages: Java, C#, Python, C/C++, JavaScript/TypeScript, HTML/CSS, MySQL, Swift, MongoDB

Frameworks: .NET, Django, React.js, Flask, SwiftUI, Node.js

Libraries: PyTorch, NumPy, Pandas, Matplotlib, Streamlit

Developer Tools: Git, Azure DevOps, Linux/Unix terminal
