

Aviraj Khanuja

DLF Phase 1, A-48/12| avirajkhanuja@gmail.com | +91 9560503443

EDUCATION

The Shri Ram School Moulsari, Moulsari Avenue DLF Phase 2

Grades 11 & 12 IBDP

Relevant Coursework:

HL: Math Analysis and Approaches, Business Management, Physics,

SL: English A Literature, French B, Chemistry

Standardized Testing:

SAT- 1540

Toefl- 114

LEADERSHIP

President Of The Graphic Design Club

May 2024 to May 2025

- Taught graphic design to 30+ middle school students at the school
- Helped master PhotoPea and PhotoShop skills—wrapped text, typography and logo design

Independent Research Author

June, 2024

- Awarded CREST Gold
- Research accepted in the *International Journal of High School Research*
- Independent research on “Predicting S&P 500 Closing Price Using Macroeconomic Data: A Comparison of SVM, Random Forest, and XGBoost.”
- Trained 3 Machine Learning Models on U.S Macroeconomic Data. Later, conducted a comparative analysis of the testing accuracy of these models when used to predict the closing price of the S&P 500 index. Results concluded Random Forest as the most consistent and accurate model
- Paper qualified for the first selection for the St. Yau competition, placing top 28/600 teams for the competition.

Team Lead for the School State Level Hackathon Team:

March 2023-Present

- Lead the School Hackathon team to several state level events
- Most notable ones were:
 - The SpringDales School (1st place): developed *MindSpa*, a personalized spiritual app,

that curates music using ML, offers tailored life advice, and facilitates spiritual discussions.

- ShriTeq@The Shri Ram School (2nd Place): built *NIVARA*, an app using a BERT model to detect misinformation in scholarly articles, achieving a 85% testing accuracy
- Ek pehchaan @The pathways School (2nd place): built *Venturely*, an app helping Venture Capitalists streamline investments by providing predictive insights on startups through a regression model

COMMUNITY ENGAGEMENT

Facilitator at the Rasoi On Wheels Foundation NGO

May 2024-Present

- Set up a 10-PC computer Lab at the NGO, giving access to technology to many students who never had this access before
- Using this Lab then held and took 20 graphic design sessions with these kids mastering them with various skills on photopea and GIMP such as logo design, poster making and so on.

INTERSHIPS

Summer and Winter Intern @ Styl AI December - January 2023; June- July 2024 I was contacted and Worked directly under the Founder, Dhruv Bhindra, a student @Duke University.

- Over both sessions, I worked on data scraping as well as Preprocessing thousands of products from Shopify websites and converting them into clean rows of data in a CSV file
- In this internship, I directly worked with datasets and made me choose data science as a major
 - Met and exceeded the work expectation by Dhruv and received a written LOR

AI Research Intern | Naggaro Technology Consulting June 2024 (8 weeks)

- Developed stock prediction model for HBL Power Systems using news sentiment analysis with BERT and LSTM
- Achieved 94.7% training accuracy and 91.2% testing accuracy over 8-week analysis period
- Mentored by Senior DevOps Engineer in implementing machine learning models for financial forecasting

SUMMER PROGRAM

Leadership Summer Programme @The Doon School July - Aug 2020 *Summer At Doon 2023*

- Were Taught Types of Leaderships as well as its concepts and applications. Engaged with daily activities such as Film Making, Community service (Natural Soap making and decorating the local NGO), Intergroup Olympic Sports and introduction to Raspberry pi.

SKILLS

- **Graphic Design:** Proficient in PhotoPea, Photoshop, GIMP; logo and poster design. •
- Machine Learning:** Proficient with multiple deep learning models (CNNs like AlexNet, GRU, LTSM, BERT etc.) as well as traditional learning models (Random Forest, SVM, XGBoost, linear regression, logistic regression, K-Nearest Neighbour, etc) •
- Programming:** Python, R; data scraping, data preprocessing and cleaning, Model training, hyper-parameter tuning and predicting, Tkinter, Django, and FLASK.
