SUMMARY

I am a motivated junior at the University of California, San Diego, pursuing a double major in Data Science (specializing in Machine Learning & AI) and Mathematics. I have honed my skills through hands-on projects-building interactive visualizations, cleaning and modelling real-world datasets, and deploying predictive ML pipelines. I am seeking roles that will challenge me, foster my professional growth, and deepen my expertise in data-driven problem solving.

PROJECT

Earthquakes - The Seismic Lottery

May 2025 - Jun 2025

UCSD

- Led a team of four to design and launch The Seismic Lottery, an interactive D3.js web app visualizing earthquakes, enabling in-depth exploration of magnitude, depth and casualty relationships.
- Developed custom interactive tools for users to model earthquake scenarios and explore predictions of infrastructure response within the application's visual environment.
- Secured both Best Project and People's Choice awards out of 40 competing teams, earning unanimous acclaim from faculty and 150+ student attendees.

Power Outages Case Study

Mar 2025 - Apr 2025

UCSD

- Conducted a data science exploration on over 1,500 U.S. power outages (2000-2016), cleaning data in Python and engineering hurricane, seasonal, and customer-impact features.
- Trained Random Forest and Gradient Boosting models with grid search, achieving a 16.7% reduction in RMSE for predicting outage duration.
- Built interactive dashboards with choropleth maps, scatter plots, and pivot tables to highlight regional outage trends and inform grid-resilience planning.

EXPERIENCE

HummingWave

Jul 2025 - Sep 2025

ML Intern

Bengaluru

- Built a chatbot using Retrieval-Augmented Generation (RAG) and LangChain, enabling effective querying over 2000+ EV chargers to uncover usage patterns and improve customer insight access.
- Applied agentic routing and query decomposition techniques with LangChain to improve the chatbot's capability in addressing ambiguous queries about EV charger operations, assisting in expansion planning for stakeholders.
- Cleaned and transformed large-scale MySQL databases (10M+ rows), standardizing fragmented data sources to support analytics and identify high-impact operational trends.

Paperboat

Jun 2024 - Jul 2024

Intern

Bengaluru

- Created a data pipeline that automated data wrangling and data cleaning using Python and Pandas. This saved 50 hours of arduous labour and improved data accuracy.
- Configured a Google Cloud account using Firebase to enhance data security, ensuring reliable data storage and access
- Engineered a Tableau dashboard that visualized daily operational metrics for 5 departments, enabling department heads to track KPIs in real time and decreasing monthly reporting cycles by 30%.

CureFoods

Jun 2023 - Jul 2023

Intern

Mumbai

- Streamlined high-velocity business processes by learning operational techniques, enhancing efficiency
- Automated part of the material requisition process using Python, integrating 100+ recipes with production plans to generate raw material requisitions.
- Saved 2 man hours daily and reduced errors thereby improving productivity.

EDUCATION

University of California San Diego

2023 - 2027

Bachelor of Science, Data Science

- **GPA:** 3.952/4.0
- **Achievements:** Awarded Provost Honors in 7/7 terms
- **Coursework:** DSC 106 Visualisation, DSC 100 SQL, DSC 80 Practice and Application of DSc, DSC 40B DSA & Graph Theory, DSC 40A Theoretical Foundation of DSc, DSC 30 DSA, DSC 20 Intro to Python, DSC 10 Principles of DSC, CSE 150A Probabilistic ML, Math 18 Linear Algebra, Math 20B CALC II, Math 20C CALC III, Math 20E Vector, Math 20D Differential Equations, Math 109 Mathematical Reasoning, Math 183 Probability and Statistics, DSC 190 RL, DSC 102 Scalable Data, CSE 158 Recommender Systems

SKILLS

- **Languages:** Python, Java, SQL, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Pandas, Streamlit, React, D3.js, YOLO (Computer Vision)
- **Cloud & Platforms:** Google Cloud Platform, Firebase, OpenSearch, MySQL Workbench
