

DANIEL MATHEWS

+1 (657) 345-3918 | djmathews@ucsd.edu | La Jolla, San Diego, CA, USA | [Data Science Portfolio](#) | [LinkedIn Profile](#)

SUMMARY

Data Science student specializing in ML/AI experienced in full stack development, predictive modeling, & building production ready tools for engineering & business use cases.

EDUCATION

University of California - San Diego

Junior Standing - Graduating in June 2029 – 3.766 GPA

Bachelor's, Data Science

- B.S. in Data Science (Specialization in Machine Learning / Artificial Intelligence)

TECHNICAL SKILLS

- **Programming:** Python (NumPy, pandas, scikit learn), R, Java, C++
- **ML/AI:** Regression, Classification, PCA, Gradient Boosting, RAG pipelines
- **Data & Databases:** SQL (MySQL, PostgreSQL), ETL/ELT, REST APIs
- **Web Development:** JavaScript, TypeScript, React, Node.js, HTML/CSS, Tailwind
- **Visualization:** Matplotlib, Seaborn, Plotly, Tableau, Power BI
- **Cloud & DevOps:** GitHub CI/CD, Google Cloud
- **Tools:** Git, Notion, Jupyter, VS Code
- **Soft Skills:** Project Management, Troubleshooting, Adaptability, Critical Thinking

PROFESSIONAL EXPERIENCE

Boeing

Huntington Beach, CA, USA

- Engineered a Python based visualization tool (using NumPy, pandas, Flask) that transforms 5D+ hypersonic trajectory data with 13,000+ data points into intuitive 2D heatmaps, improving engineer analysis workflows.
- Led 8-person team as Integrated Product Leader in programming ML-driven autonomous Donkey Cars for a company-wide race challenge.

Data Science Society Software Team

La Jolla, CA, USA

Board Member

October 2025 – Present

- Promoted to Project Manager after one month as a developer; organized dev team and stakeholder meetings to fix integration and ship a new DS3 consulting site.
- Used Github and Notion for team coordination, working with JavaScript (Node, React), Tailwind CSS, and HTML to execute and enhance full-stack projects.

Wyzant

La Jolla, CA, USA

Private Tutor

December 2025 – Present

- Creating personalized study plans for high school and college students in Economics, Computer Science, and Statistics. Helped raise student grades by an average of 10% overall, and boosted test taking confidence with student-specific teaching styles and adaptive, structured lesson plans.

PROJECTS & OUTSIDE EXPERIENCE

SKIPREDICT – Skipability Score of Any Given Song

Yorba Linda, CA, USA

Predictive Algorithms, Responsive Design, Full-Stack Application

July 2025 – September 2025

- Engineered a **full-stack predictive model** to estimate **probability** that a user skips a song by developing a custom machine learning algorithm that analyzes and weights key audio features (energy, valence, tempo, ect).
- Tech Stack including **Python/Flask**, integrating the iTunes Search **API** with **JavaScript, HTML, and CSS** for an interactive frontend, **RESTful** endpoints + **JSON** data parsing,
- [Link to project](#)

Quantum Dimensionality Reduction for Portfolio Optimization

La Jolla, CA, USA

PCA, Ridge Regression, Gradient Boosting, Feature Extraction

September 2025 - Present

- Deployed an algorithmic trading system that combines **dimensionality reduction techniques** (including a quantum-inspired approach) with **machine learning classifiers** to forecast price movements of the **NVIDIA stock** using **scikit-learn, Matplotlib, Seaborn, numpy, pandas**, and the **Yahoo Finance Library (yfinance)**
- Sharpe Ratios ranging from **0.8 to 1.5**, with overall test accuracies ranging from 55%-65% in predicting price movement
- [Link to project](#)

ClarityCart – Agentic AI Ecommerce Customer-Support Assistant

La Jolla, CA, USA

LLM + RAG Pipelines, Specialized Chunking, Vector Database

October 2025 – Present

- Currently building a hyper-specific AI Chatbot for Small Business Websites that utilizes a **retrieval pipeline with vector and keyword hybrid search**
- Features agent workflows with **intent detection, tool selection, retrieval, and response synthesis** with **document chunking** for reading and storing the product catalog
- [Link to project](#)

CERTIFICATIONS

- **Google Data Analytics Professional Certificate (Coursera)** // **Excel Desktop (Microsoft 365) Certificate** // **Data Structures in Python (LinkedIn Learning)**
- **Python and Statistics for Financial Analysis (Hong Kong University of Science and Technology)** // **SQL for Data Analysis (LinkedIn Learning)**
- **Create an Agent Using Agentforce DX Badge (Salesforce)** // **Python for Data Science and Machine Learning (LinkedIn Learning)**
