SUMMARY

Data Science student and ML enthusiast with production experience building backends and shipping AI features. Familiar with statistical concepts and practical Python ML (pandas, scikit-learn, Hugging Face). Comfortable building REST APIs, data pipelines, and evaluating models

EDUCATION

University of California, San Diego <i>Bachelor of Science in Data Science</i>	La Jolla, CA <i>Expected June 2027</i>
Irvine Valley College <i>Associate of Science in Computer Science</i>	Irvine, CA <i>May 2025</i>
• Coursework: Data Structures & Algorithms, Discrete Mathematics, Linear Algebra, Statistical Analysis	
UC Irvine <i>Certificate in Full Stack Web Development</i>	Irvine, CA <i>June 2023</i>

EXPERIENCE

Software Engineering Intern <i>DrySci</i>	Remote <i>June 2025 – Aug. 2025</i>
- Designed and extended Swage, an internal automation platform that generated client websites from JSON templates, cutting manual setup time by ~50%. - Built customizable hiring form templates with PHP/Laravel overrides and Livewire, enabling non-technical admins to deploy workflows in minutes. - Integrated validation and anti-spam measures, reducing invalid submissions by ~40% and improving conversion reliability. - Analyzed funnel analytics to surface drop-offs and prioritized fixes, improving completion on key forms.	

LEADERSHIP

Project Director <i>IVC Computer Science Club</i>	Irvine, CA <i>Aug. 2023 – May 2024</i>
- Organized 10+ full-stack workshops and mentorship sessions, guiding 30+ students to build and deploy projects. - Secured sponsorships and launched monthly coding challenges, increasing club participation by 40%. - Facilitated project ideation groups, resulting in 5 successful student-led launches.	

PROJECTS

EcoTracker (HackSC 2024 Winner) <i>React Native, Node.js, Firebase</i>	Nov. 2024
- Achieved 1st place in Adventure Category among 50+ teams at HackSC 2024. - Built mobile app encouraging eco-friendly actions; validated activity photos via a server-side ML API to reduce false approvals. - Implemented reward ranking with streak logic to drive engagement and retention.	
SkillBridge <i>Python, Hugging Face, scikit-learn, pandas, ChromaDB, React</i>	Dec. 2024 – Present
- Developed an AI skill-gap analysis system processing multiple resumes in parallel; extracted and matched skills using embeddings and lightweight NER-style patterns. - Indexed 15,000+ skills in a vector store (ChromaDB) and implemented similarity search (cosine) for matching; reported precision/recall/F1 to benchmark updates. - Built a simple REST endpoint for inference and a React UI to visualize matched vs. missing skills.	

TECHNICAL SKILLS

Backend / APIs: PHP, Python, Flask, Node.js, Express, Laravel, REST, JSON
Machine Learning / AI: pandas, scikit-learn, Jupyter, matplotlib
Data & Databases: SQL, MySQL, MongoDB, ChromaDB (vector search)
Frontend: React, Next.js, React Native, HTML/CSS, TypeScript, JavaScript
Tools / Cloud: Git/GitHub, Google Cloud (basic), Linux
