

Divyansh Kanodia

jobs.divyansh@gmail.com | <https://www.linkedin.com/in/divyansh-kanodia-0978611a9/>

Data Science and Business Economics student at UCSD (GPA 3.9) with hands-on experience in machine learning, reinforcement learning, and end-to-end data science projects. Skilled in Python, SQL, TensorFlow, and Keras, with experience building pipelines, evaluating models, and deriving actionable insights. Passionate about using data-driven solutions to improve user outcomes.

EDUCATION

University of California, San Diego

Bachelor of Science in Data Science and Business Economics

Cumulative GPA: 3.9

Awards and Honors: Provost honors

Relevant Coursework: Introduction to Programming and Computational Problem-Solving, Introduction to Data Science, Calculus for Science and Engineering, Data Structures for Data Science, Linear Algebra, Data Structures and Algorithms for Data Science, Microeconomics, Macroeconomics.

San Diego, California

Expected May 2027

RESEARCH EXPERIENCE

Tan Labs

Research Assistant

San Diego, California

April 2025 – June 2025

- Conducting research on **integrating Large Language Models (LLMs)** into robotic systems to enhance autonomous decision-making capabilities.
- Utilizing **MATLAB simulations** to model and analyze robotic behaviors in response to natural language inputs.
- Collaborating with a multidisciplinary team to develop frameworks that enable robots to interpret and execute complex tasks based on linguistic instructions.

WORK EXPERIENCE

KPMG

Valuation Intern

Gurgaon, India

July 2024 – September 2024

- Conducted market research and valuation analyses across beauty, personal care, restaurant, and IT sectors.
- Built transaction models for 35+ companies, applying key metrics (EV/EBITDA, EV/Revenue).
- Authored a report analyzing interest rate impacts on 40+ NBFCs across 5 industries.

The Indian Conclave

Senior Executive of Technology

Remote

June 2021 – March 2023

- Led development of organizational tech infrastructure using **PHP, SQL, and Python**.
- Implemented a Business-to-Consumer framework, boosting revenue by **40%**.
- Expanded staff from **20 to 50** through optimized hiring pipelines and reporting.
- Managed and maintained company website; mentored a 4-person web dev team.

PROJECTS

Tic Tac Toe Bot

<https://github.com/anigmae/TicTacToe>

- Developed a reinforcement learning-based Tic Tac Toe bot that employs Min-Max and Q-learning algorithms for optimal decision-making.
- Conducted **empirical testing of bot** performance against random strategies.
- Achieved a perfect **win rate (100%)** against random moves and consistently **draws if played optimally** by the opponent.
- Explored **optimal strategies** and decision trees to enhance performance, offering insights into decision-making processes in constrained environments.
- Developed custom data pipelines using Python and SQL to log training metrics and analyze episode reward distributions.

Frozen Lake Solver

https://github.com/anigmae/frozen_lake

- Engineered a Q-learning model to solve OpenAI's gym Frozen Lake puzzle, achieving **79%** accuracy after **10,000+** training episodes.
- Applied reinforcement learning to solve pathfinding problems under uncertain, stochastic conditions, offering insights into real-world applications of machine learning in grid-based problems.

ADDITIONALS

- Machine Learning & Data Science:** TensorFlow, Keras, Pandas, NumPy, Matplotlib, Reinforcement Learning, Statistical Modeling, Econometrics
- Programming:** Python, Java, JavaScript (Node.js, Express.js), SQL, AWS
- Databases:** MongoDB, SQL
- Development Practices:** Git, Agile Development, Unit Testing
- Languages:** English, Hindi
- Research Focus:** Machine Learning, Data Science, Game Theory, Algorithm Development
- Strengths:** Algorithmic Problem Solving, Research Methodologies, Academic Writing, Economic Analysis
