• Reconciled cash transactions for game booths, maintaining accurate financial records at the end of each shift	
• Increased customer engagement and revenue by monitoring participation data to appeal to diverse cultural audiences.	

PROJECTS

<u>"How does region/continent correlate to the average win rate of esports teams?"</u> (COGS108: Data Science in Practice)
• Led a four person team through the project on GitHub : from proposal, data collection, to final analysis
• Collected and visualized performance data across multiple games/platforms using Python, Seaborn, matplotlib, Pandas
• Concluded that teams from East Asia demonstrated a consistently higher win rate compared to other regions due to factors such as cultural differences and training intensity

SKILLS

• Python, Excel, GitHub
• English (Fluent), Japanese (Limited Working Proficiency), Korean (Elementary Proficiency), Vietnamese (Elementary Proficiency)
