

GRANT HARRISON WAGENER

San Diego, CA • GrantHWagener@gmail.com • (818) 395-5662

SUMMARY

Data Science and Engineering graduate student with 5+ years of healthcare technology experience spanning strategy, data analysis, and QA engineering. Skilled in CMS enrollment data analysis, risk adjustment modeling, and test automation (Python, MATLAB, LabVIEW). Pursuing a Master's in Data Science and Engineering at UC San Diego (anticipated June 2026).

EDUCATION

University of California San Diego – La Jolla, CA **Sept 2024 – June 2026 (Anticipated)**
Master's in Data Science and Engineering, Halicioğlu Data Science Institute & Jacobs School of Engineering

Davidson College – Davidson, NC **May 2018**
Bachelor of Arts in Economics; Minor: Philosophy — Cum Laude, GPA: 3.54

TECHNICAL SKILLS

Languages: Python, R, SQL, MATLAB, Mathematica

Tools & Platforms: SAS, ArcGIS, LabVIEW, Git

Domains: CMS Risk Adjustment, Value-Based Healthcare, FDA Compliance, Statistical Analysis, GIS

EXPERIENCE

Ventric Health – Remote / Pasadena, CA **June 2019 – December 2024**

Analyst, Strategy and Marketing (December 2019 – December 2024)

- Stratified health plans using nationwide CMS enrollment data to identify and prioritize prospective clients for targeted outreach
- Developed value-based pricing for flagship diagnostic product by applying the CMS Risk Adjustment model, optimizing price to maximize client ROI
- Prepared revenue projections and cashflow analyses presented to CEO and senior leadership to inform strategic decisions
- Conducted competitive landscape research to inform product positioning and direct R&D priorities
- Synthesized medical literature for published whitepapers and marketing/investor materials

Engineer, Development and QA (September 2019 – May 2023)

- Designed end-to-end testing strategy for firmware and mobile app software of a non-invasive diagnostic device, ensuring comprehensive coverage including data integrity validation
- Collaborated with VP of Product, VP of Operations, and Data Science team to refine requirements and test protocols meeting FDA guidelines
- Automated device performance testing by developing scripts in MATLAB, Python, and custom LabVIEW panels, reducing manual testing time
- Resolved critical Bluetooth connectivity issues with development team and external contractors, increasing manufacturing yield by >30%
- Analyzed proof-of-concept test results, providing statistical insights that guided iterative design through final product release

Tester, Development and QA (June 2019 – September 2019)

- Developed standardized bug reporting forms and formalized issue resolution protocol across the QA team
- Identified and resolved 100+ bugs across iOS, Android, and embedded firmware applications

San Diego Hunger Coalition – San Diego, CA **January 2019 – May 2019**

Database Intern & CalFresh Program Assistant

- Designed and implemented a relational database integrating federal food distribution statistics with privately collected data
- Geocoded and mapped sites using ArcGIS to identify high-need, low-access areas, informing targeted expansion of programming coverage

INTERESTS

Skiing, Hiking, Mapping, National Park History, Game Nights, Value-Based Healthcare
