

Harshini Kanakala

San Diego, CA | (408)-489-4033 | hkanakala@ucsd.edu | [in/harshinikanakala](https://www.linkedin.com/in/harshinikanakala)

EDUCATION

University of California, San Diego

Expected June 2028

Bachelor of Science in Data Science | Minor in Mathematics

Relevant Coursework: Data Structures and Algorithms, Statistical Analysis Inference, Linear Algebra, Machine Learning Algorithms

WORK EXPERIENCE

GenInvo | Bloomington, IL

Jul 2025 - Sep 2025

Software Engineering Intern

- Developed and maintained Python-based data pipelines for **DataLutions**, a synthetic data generation platform, **extracting** and **normalizing structured clinical trial** metadata from unstructured protocol documents using **OCR, REST APIs, and Hugging Face NLP**.
- Built, tested, and **debugged RESTful API endpoints** for the Protocol Scraper and synthetic data modules, fixing production bugs and improving reliability of data ingestion, validation, and downstream system integration.
- Authored and **maintained technical documentation** including environment setup, API schemas, sample payloads, and troubleshooting guides to support deployment, onboarding, and continued development of a new production system.

(i4X) Program | UCSD Capital Program Management

Dec 2025 - Present

Product / Data Analytics Intern

- Selected for competitive program to support UCSD CPM by **analyzing 14+ years of historical construction cost data**, translating stakeholder questions into structured analyses, and improving project planning and capital resource allocation.
- Led end-to-end **data cleaning and analysis for 100+** healthcare construction projects (**\$1M-\$70M+**), defining project size categories, **modeling monthly spend trajectories**, and building **visual analyses** to compare cost behavior across projects.
- Designing a **forecasting model** using historical monthly spend patterns to **predict project cost trajectories**, enabling leadership to benchmark similar-scale projects and support more informed budgeting and long-term capital planning.

Senior Data Analytics Dr. | UCSD Associated Students

Jul 2026 - Present

Data Analyst Intern

- Led the Data Analytics team, managing **end-to-end data collection, exploratory data analysis**, and reporting workflows across survey, engagement, and operational datasets to support **organization-wide decision-making and strategic initiatives**.
- Conducted exploratory and **ad-hoc data analyses** on survey responses, social media metrics, and internal operational data to identify trends, patterns, and **actionable insights** for leadership and cross-functional teams.
- Designed and delivered** structured analytical reports and **visual summaries** using charts and dashboards, translating complex datasets into clear findings used by communications, social media strategy, and executive planning committees.

PROJECTS

Spotify Popularity Prediction Game

April 2025

DS3 Hackathon

- Built interactive web game** using real Spotify data, enabling users to predict and compare song popularity scores.
- Designed and implemented a **responsive interface with HTML, CSS, and JavaScript** to create an engaging user experience.
- Developed an interactive web dashboard** to visualize Spotify song popularity and track feature trends for data-driven gameplay.

Trach Classifier

June 2025 - Sep 2025

ACM Projects Team

- Collaborated with a 5-member team to design and train a **Convolutional Neural Network (CNN)** using **PyTorch**, classifying 7 categories of waste with optimized accuracy through **adaptive pooling and dropout regularization**.
- Developed** a full-stack web application with a **Flask backend and React frontend**, enabling real-time image uploads, model inference, and waste classification powered by a trained **convolutional neural network (CNN)**.
- Optimized model performance** and scalability by improving inference speed, applying multi-layer regularization (dropout, batch normalization), and refining the training pipeline to improve generalization across unseen waste images.

AWARDS

Codology Ideathon 2nd place Winner

- Competed against 500+ participants from 30+ countries as part of a 3-member team
- Coordinated efforts to conceptualize a sex education resource platform by designing **UI/UX visual prototypes**, and developing a comprehensive pitch deck to effectively present the idea

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: PyTorch, FastAPI, React, Pandas, NumPy, Matplotlib, Tableau, Power BI

Tools & Platforms: Git, AWS, Tableau, Microsoft Office, AWS, Git, VSCode, Spyder, Figma, Azure
