EDUCATION

Cornell University

Master of Science in Business Analytics

New York City, NY

Aug. 2026 – May 2027

University of California, San Diego

Bachelor of Science in Data Science, Minor in Cognitive Science

La Jolla, CA

Sep. 2022 – Mar. 2026

- Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Systems for Scalable Analytics, Web Mining and Recommender Systems, Machine Learning, Artificial Intelligence

PROJECTS

Cashflow-Based Credit Risk Modeling at Prism Data | *Python, Machine Learning, NLP* Sept 2025 – Present

- Processed and standardized 2.5M+ banking transaction memos using regex and NLP preprocessing to improve model-ready data quality for cashflow-based underwriting.
- Fine-tuned a DistilBERT sequence classifier with Hugging Face Transformers, achieving 97.9% accuracy / 0.979 F1, a 6% improvement over a TF-IDF + Logistic Regression baseline, and reducing validation loss to 0.073.

The Road to Recovery: Predicting Hospital Readmissions | *Python, ML, NLP* Jul 2025 – Aug 2025

- Developed hospital readmission prediction system using Python and XGBoost, achieving 78-79% recall.
- Built ML pipeline comparing Logistic Regression, Random Forest, and XGBoost with F-beta optimization to address 11% class imbalance in patient readmission.
- Combined NLP embeddings from discharge notes with clinical features for clustering (K-Means, UMAP), revealing 3 patient risk profiles.
- Produced insights showing 6 targeted interventions prevent 1 readmission, guiding cost-efficient care for high-risk patients.

Medicare Star Insights | *Data Analytics, Pipeline Modelling, Data Viz* Aug 2024 – September 2024

- Implemented imputation strategies for missing data while enhancing usability using pandas
- Conducted ANOVA and two-sample t-tests to assess the significance of key factors influencing Medicare ratings
- Built an SVC Pipeline Model with 96% accuracy to predict providers with low or high Medicare ratings
- Analyzed findings from statistical tests/visualizations and recommended actionable steps for health insurance companies to improve Medicare star ratings
- Developed and deployed a website hosted on Vercel using HTML and CSS to present findings

EXPERIENCE

Publicity Chair,

Women in Computing

La Jolla, CA

Sep. 2024 – Present

- Organizes information such as internship, job, scholarship opportunities, and WIC events for the weekly newsletter
- Increased club newsletter membership by 220+ registrants
- Strategically promotes WIC events across internal (newsletter, Instagram, Discord) and external (CSE department displays and calendar, UCSD IDEA Newsletter) communication channels to maximize outreach and engagement.

Marketing Director,

Data Science Student Society (DS3)

La Jolla, CA

Nov. 2023 – Present

- Handles Data Science Student Society Social Media and send out a weekly newsletter to general body members
- Liaison of DS3 for the Halicioglu Data Science Institute Career Services to support career workshops
- Increased Discord membership by 900 members, growing the community to 1,970+ members since taking over
- Analyzed audience behavior metrics to optimize marketing strategies for increased engagement

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Java, HTML, CSS, JavaScript

Frameworks & Tools: Pandas, NumPy, Scikit-Learn, TensorFlow, XGBoost, Spark, PostgreSQL, SQLite, AWS EC2, Git, GitHub, Jupyter Notebook, ML Algorithms (neural networks, tree-based methods, optimizers, super/unsupervised learning, feature engineering), Excel, Tableau

Languages: English (native), Mandarin (intermediate)
