EDUCATION

University of California, Santa Barbara

Santa Barbara, CA

Bachelor of Science, Statistics and Data Sciences

2023-2025

- **Cumulative GPA:** 3.96
- **Course Work:** Principle of Statistics, Data Analytics in R, Data Theory, Algorithm, Python, NumPy, Linear Algebra.

University of California, San Diego

La Jolla, CA

Bachelor of Science, Data Sciences

Graduation Date: June 2027

- **Course Work:** Probability Theory, Python, Pandas, R, Linear Regression, Random Forest, Risk Minimization.

WORK EXPERIENCES

Institute of Physics, Academia Sinica

Taipei, Taiwan

Lab Research Intern

July - September 2025

- Built end-to-end data-analysis pipelines in C++/ROOT to process over 0.5–1M simulated collision events, applying statistical fits, background filtering, and visualization to identify particle patterns.
- Automated data cleaning, feature extraction, and binning for kinematic variables to enhance analysis accuracy.
- Developed a configurable detector simulation to generate synthetic datasets for ML training and efficiency studies.
- Presented research findings in a poster session, highlighting data workflows and simulation-driven insights.

Go Cafe

Taipei, Taiwan

Front House Manager

July - September 2024

- Table Maintenance and Cleaning; Managed seating arrangements. Prepared a range of beverages.
- Handled cash and card payments. Monitored stock of supplies and restocking

Apollo Medical Optics, Ltd.

Taipei, Taiwan

Data Analyst Intern

July - September 2022

- Analyzed industry reports on dermatoscopes and summarized future market trends; presented findings to the CEO.
- Participated in meetings on OCT image system development; tested optical imaging functions and recorded Holey Fiber polishing data under a microscope.

RESEARCHES & PROJECTS

National Cheng Kung University AI Talents Summer Program

Taipei, Taiwan

Group Project Researcher

July - August 2023

- Learned about fundamental concepts of artificial intelligence and big data models.
- Built, test & adjusted an AI data crawler using Python. Graphed testing results and predict performance curve

Baymaxxing-DataOrbit 2025

Santa Barbara, CA

Data Analyst & Project Founder

February 2025

- Developed an AI-driven mental health web app using Python, Flask, and NLP that performs sentiment and severity classification from user input and retrieves relevant Reddit discussions.
- Collected and processed large-scale Reddit data via the PRAW API, performing data cleansing, labeling, and stored as CSV.
- Trained two generative models using Groq API for real-time response generation and emotional context analysis.
- Built an interactive dashboard visualizing sentiment distributions across user categories and severity levels using Tableau

LEADERSHIP EXPERIENCES

UCSB Taiwanese Student Association (TSA)

Santa Barbara, CA

Vice Head of Secretary

December 2023 - present

- Hosted orientations, cultural nights, socials, and more with other clubs and UC schools, profited over \$400 USD per event; Communicate with other clubs and schools for details and execution of the event
- Create sign-up forms for events and monitored the responses; record notes for each meeting

Reball

Taipei, Taiwan

Cofounder and Technician

March 2022 - March 2024

- Founded a start-up that recycles used basketballs from schools into eco-friendly consumer products, integrating sustainability and design innovation; launched and promoted a crowdfunding campaign on Zecsec.
- Designed the recycling system and prototype product (backpack); led outreach with schools, sponsors, and the public.

SKILLS & AWARDS

Awards: UCSB Dean's Awards, Champion of NTU National BP Debate Cup, ARML local silver medal

Skills: Python, R, Java, SQL, LaTeX, Tableau, Generative AI, Microsoft Office, Creative & Analytical skills
