EDUCATION

University of California San Diego, La Jolla, CA

Expected: March 2027

Bachelor of Science (B.S.) in Data Science & Minor in Cognitive Science

- **Relevant Coursework:** Data Structures & Algorithms, Databases, Data Cleaning, Exploratory Data Analysis, Machine Learning, Feature Engineering, Data Visualization, Statistical Modeling, Regression Analysis, Natural Language Processing, Dimensionality Reduction, PCA, Probability & Statistics, Linear Algebra, Calculus

TECHNICAL SKILLS

- **Languages:** Python, SQL, HTML, CSS, JavaScript, Java, C++, Markdown, MATLAB, LaTeX
- **Libraries & Tools:** Pandas, NumPy, scikit-learn, Git, GitHub, VS Code, Jupyter Notebook, Excel
- **Machine Learning:** Linear/Logistic Regression, K-Means, Random Forests, Naive Bayes, Lasso/Ridge, NLP
- **Data Visualization:** Tableau, Plotly, Matplotlib, Seaborn, Excel charts, D3

EXPERIENCE & LEADERSHIP

Mentor, The DataJam, San Diego, CA

October 2025 – Present

- Mentor high school students in end-to-end data science projects by developing example analyses and guiding research design, data cleaning, exploratory analysis, modeling, and presentation

Researcher, Triton Ball Sports Analytics, San Diego, CA

June 2025 – Present

- Conduct data-driven projects analyzing player and team performance, develop statistical models to support strategic insights, and collaborate with analysts to refine methodologies and communicate findings

Project Developer, Data Science Student Society, San Diego, CA

September 2024 – Present

- Engage in data-driven projects and hackathons while strengthening technical proficiency through workshops covering topics such as Python, SQL, and Generative AI, hosted by the Data Science Student Society

Founder & President, Hawaii Club, San Diego, CA

September 2024 – Present

- Founded and lead a student organization, managing events, coordinating teams, and driving campus-wide engagement through effective leadership and communication

Coding Instructor, Brains & Motion, San Diego, CA

October 2025 – January 2026

- Taught programming concepts by translating complex ideas into clear, problem-solving focused lessons

RELEVANT PROJECTS

Weather & Wheels – Exploring How Weather Shapes Bike-Sharing Usage

December 2025

Presented to high-school students nationwide through DataJam Program

- Analyzed how weather conditions (temperature, wind, precipitation, etc.) impact bike-sharing usage in San Diego
- Project taught students how to formulate a research question, collect and clean data, perform exploratory data analysis, build a regression model, and communicate findings clearly

StatPilot – Predictive Sports Analytics Web App

April 2025

Winner: Innovation Launchpad Award (most innovative project at DataHacks 2025)

- Built an interactive sports analytics web application in a 2-day hackathon to model player performance probabilities using large-scale historical NBA game data scraped from ESPN
- Designed a predictive model in Python with SciPy, linear regression, feature engineering, dynamic weighting, and cumulative distribution functions to calculate over/under probabilities
- Communicated analytical insights through a clean, user interface and presented findings to a panel of judges

Cooking Up Insights – Recipe Ratings & Calorie Prediction Analysis

May 2025 – June 2025

- Built a Python-based web project analyzing 800K+ Food.com recipes to uncover trends between cooking time and user ratings using data visualizations and hypothesis testing
- Cleaned, merged, and filtered 800K+ recipe records; engineered and normalized features with StandardScaler and QuantileTransformer; developed and tuned a Random Forest Regressor with 5-fold cross-validation to predict calorie content and assessed model fairness across recipe complexity levels
