

# Kelvin Mai

San Diego, CA | +1 (510) 325-9663 | [maikelvin47@gmail.com](mailto:maikelvin47@gmail.com) | [linkedin.com/in/kelvin-mai](https://linkedin.com/in/kelvin-mai) | [github.com/watawada](https://github.com/watawada)

## EDUCATION

---

### University of California, San Diego

San Diego, CA

*B.S. Mathematics-Computer Science; GPA: 3.9*

*Sep. 2023 – Jun. 2027 (expected)*

- Relevant Coursework: Data Structures and Algorithms, Systems Programming, Software Tools, Machine Learning Algorithms, Linear Algebra, Linear Programming, Differential Equations, Multivariable Calculus

## EXPERIENCE

---

### San Diego Supercomputer Center

La Jolla, CA

*AI/ML Intern*

*Nov. 2025 – Present*

- Developing machine learning pipelines for early wildfire detection using ViTs, CNNs, and VLMs
- Collaborating with researchers to analyze scientific datasets and present findings to multidisciplinary teams

### Power Transformation Lab

La Jolla, CA

*Software Developer*

*Dec. 2025 – Present*

- Assisting with backend development of data visualization tool using Django

### University of California, San Diego — Department of Mathematics

La Jolla, CA

*Tutor (Algebra, Trigonometry, Precalculus)*

*Sep. 2024 – Present*

- Guided undergraduates in mastering foundational math concepts through structured problem-solving sessions
- Improved course and exam pass rates by 8% through personalized tutoring and targeted review materials

## PROJECTS

---

### Study Buddy | *FastAPI, Python, JavaScript, Auth0*

Apr. 2025

- Engineered APIs to convert uploaded PDFs into quizzes and flashcards, turning unstructured data into interactive study tools
- Implemented secure authentication and authorization with Auth0 for scalable multi-user environments
- Awarded “Best Use of Gemini API” at UCSD DiamondHack among 50+ teams

### SwipeStyle | *TypeScript, MongoDB, REST, WebSockets*

Sep. 2024 – Dec. 2024

- Built scalable RESTful APIs and WebSocket services supporting real-time interactions in a Tinder-like clothing app
- Designed and integrated MongoDB data models for efficient handling of high-volume user and post data
- Collaborated with a cross-functional team to ensure seamless integration across frontend and backend

### Bullet Hell Game | *Unity, C#*

Oct. 2024

- Developed modular game mechanics including bullet patterns, hit detection, and enemy systems
- Collaborated with 6 teammates during a two-week game jam to deliver a polished product presented to 100+ developers

### National Debt and Well-being Analysis | *Python, Pandas, NumPy, Scikit-learn*

Jan. 2025 – Mar. 2025

- Analyzed relationships between national debt and human well-being metrics across U.S. and Canadian datasets
- Built regression models using 5,000+ data points to uncover correlations between macroeconomic factors and life-quality indicators
- Processed, cleaned, and visualized large datasets to extract actionable insights

## TECHNICAL SKILLS

---

**Languages:** Python, Java, JavaScript/TypeScript, C, C#, SQL

**Libraries:** PyTorch, Tensorflow, Scikit-learn, Pandas, NumPy

**Frameworks:** MERN, FastAPI

**Game Engines:** Unity

**Developer Tools:** Git/GitHub, Unix, Jupyter Notebook
